Our story

Armac Martin is a luxury brass hardware company, dedicated to creating beautiful brass fixtures and fittings for over 90 years. We believe in exceptional design and exquisite detail; in celebrating true craftsmanship and in the art of using the finest materials to form products that truly stand the test of time.

Our heritage

Founded in 1929, we are now a fourth-generation family business with a reputation built on heritage and skill, thoughtfully passed down from generation to generation. We are proud to be a leading name in luxury brass cabinet hardware, favoured by architects, interior designers, property developers and customers the world over for almost a century.

Harold McGrail, 1985

Our material

Dating back to 1400 B.C, brass has a rich history with the application of the material used to protect and decorate through the ages in equal measure. The material is timeless, luxurious and above all, the beauty of brass lies in the vast array of finishes that can transform each product which is why we are fascinated with its many qualities.

Our craft

From initial design sketches to masterfully hand-finishing every single piece, we oversee each phase of production in the heart of England at our Birmingham factory. Our products can be found in some of the world's finest kitchens and interiors – something we'll never take for granted and that continues to drive our commitment to excellence.

Made in Birmingham, England

We've come a long way since the 1920s... with humble beginnings led by local brass founder Harold McGrail, our business, then simply known as Armac, focused on manufacturing reproduction furniture fittings with a small team of skilled craftsman. Harold's ambition ensured that Armac continued to evolve, even through the most challenging times including WWII, and almost a century later, it's this ambition and passion for the products that continues to drive our commitment to excellence.

Today, Armac Martin is made up of a dedicated team of over 100 members, each proudly bringing you the finest brass hardware to market, with every design and detail crafted for enduring style.

Our products can be found in some of the world's finest kitchens and interiors – something we'll never take for granted and so from initial sketches to masterfully hand-finishing every single piece, we oversee each phase of production in the heart of England, from the same Birmingham location where our story once began.

Bespoke

At Armac Martin, we understand that sometimes, you may require a piece or indeed a collection specially made for your interior design project and so we're proud to offer both full and partial bespoke design and manufacturing services for our luxury brass hardware.

With nearing a century of experience, let our skilled team impeccably transform your ideas into the perfect brass fixtures and fittings for when you simply need something one of a kind.

The details

We are delighted to invite each of our bespoke clients to visit us at our Birmingham factory where we can help to inspire your designs and you can experience the manufacturing process in person. Our bespoke service includes:

CAD – 3D rendering and technical drawings so you can clearly visualise your hardware

- 3D printing from our prompt prototyping machine to produce a resin prototype that you can see and feel to experience the design and proportions
- Laser engraving to subtly add your own branding on a wide array of bespoke products and our core collections
- Expert technical sales support so you have personal support throughout

Fully bespoke

No matter what form your design ideas are in, work with our dedicated team to create a completely bespoke product. From size and style to branded engraving, we'll create 3D designs so you can experience how the finished hardware will look and feel to ensure it fits with your project, before creating final technical drawings for you to sign off before production begins.

Lead times are primarily between 8 - 12 weeks for this service.

Partially bespoke

Our partially bespoke service is perfect for when you've found the hardware pieces you need from one of our core collections, yet the measurements aren't quite right for your design. We can customise the length, diameter and projection for you so that the hardware fits perfectly for your project.

Lead times are primarily between 6 - 8 weeks for this service.

Our finishes

We truly believe that luxury is in the detail and so we take great pride in offering our customers over 20 beautiful signature brass finishes to ensure your hardware has the look and feel you desire. Each of our luxury cabinet hardware products is made from the finest solid brass and we apply an array of plated and patinated finishes to create an exquisite look for each - many of which are hand-finished by our team of expert polishers in the heart of Birmingham.

Our finishes

PBL – Polished brass lacquered

Hand-polished to achieve a smooth mirrored finish. Highly durable clear gloss lacquer is then applied and baked to ensure the lacquer cures.

Baking the lacquer ensures that a harder and more durable layer will protect the finish from day to day usage and oxidation.

PBU – Polished brass unlacquered

The product is hand polished to a smooth mirrored finish. As this is a natural living finish, the finish will naturally oxidise and patina over time.

To help maintain and preserve the finish it is recommended that you use a good quality metal polish as required.

SBL – Satin brass lacquered

The product is hand sateened to give a brushed satin finish. A highly durable clear gloss lacquer is then applied which is baked in our ovens to ensure the lacquer cures to offer lasting protection.

Baking the lacquer ensures that a harder and more durable layer will protect the finish from day to day usage and oxidation.

SBU – Satin brass unlacquered

The product is hand sateened to give a brushed satin finish. As this is a natural living finish, the finish will naturally oxidise and patina over time.

Our finishes

SBSL – Satin brass satin lacquered

The product is hand sateened to give a brushed satin finish. A highly durable clear satin lacquer is then applied which is baked in our ovens to ensure the lacquer cures to offer lasting protection.

Baking the lacquer ensures that a harder and more durable layer will protect the finish from day to day usage and oxidation.

ABL – Antique brass lacquered

The product is hand polished to a smooth mirrored finish. An antique patina is then applied to the brass before being relieved back to give the antique finish.

Finally, a highly durable clear gloss lacquer is then applied which is baked in our ovens to ensure the lacquer cures to offer lasting protection. Baking the lacquer ensures that a harder and more durable layer will protect the finish from day to day usage and oxidation.

ABU – Antique brass unlacquered

The product is hand polished to a smooth mirrored finish. An antique patina is then applied to the brass before being relieved back to give the antique finish.

As this is a natural living finish the finish will naturally oxidise and patina over time.

The more the product is handled the faster the finish will wear away, eventually leading to a more natural brass appearance.

BEL – Burnished brass

The product is hand sateened to give a brushed satin finish. A light antique patina is then applied to the brass before being placed into barrelling machines full of cones.

This is in order to achieve a naturally aged appearance to the product.

Our finishes

SAS – Satin antique satin lacquered

The product is hand sateened to give a brushed satin finish. An antique patina is then applied to the brass before being relieved back to give the satin antique finish.

Finally, a highly durable clear satin lacquer is then applied which is baked in our ovens to ensure the lacquer cures to offer lasting protection. Baking the lacquer ensures that a harder and more durable layer will protect the finish from day to day usage and oxidation.

SAL – Satin antique gloss lacquered

The product is hand sateened to give a brushed satin finish. An antique patina is then applied to the brass before being relieved back to give the satin antique finish.

Finally, highly durable clear gloss lacquer is then applied which is baked in our ovens to ensure the lacquer cures to offer lasting protection. Baking the lacquer ensures that a harder and more durable layer will protect the finish from day to day usage and oxidation.

AMB – American bronze lacquered

The product is hand sateened to give a brushed satin finish. A bronzing powder is then evenly applied to the brass before being relieved to give a smooth consistent finish.

Finally, a highly durable clear gloss lacquer is then applied which is baked in our ovens to ensure the lacquer cures to offer lasting protection. Baking the lacquer ensures that a harder and more durable layer will protect the finish from day to day usage and oxidation.

CBP – Chocolate bronze lacquered

The product is hand sateened to give a brushed satin finish. A bright copper plate is then applied. A bronzing powder is then evenly applied to the copper before being relieved to give a smooth consistent finish with a copper undertone through the bronze.

Finally, a highly durable clear satin lacquer is then applied which is baked in our ovens to ensure the lacquer cures to offer lasting protection. Baking the lacquer ensures that a harder and more durable layer will protect the finish from day to day usage and oxidation.

Our finishes

MBL – Matt black lacquered

The product is hand sateened to give a brushed satin finish before it is shot blasted to give the metal the desired surface finish.

A highly durable matt black coloured lacquer is then applied which is baked in our ovens to ensure the lacquer cures to offer lasting protection. Baking the lacquer ensures that a harder and more durable layer will protect the finish from day to day usage and oxidation.

PNP – Polished nickel plate

The product is hand polished to a smooth mirrored finish. A bright nickel plate is then applied.

Nickel finish is less durable than chrome and as a result, is classed as a living finish which will oxidise over time.

PCP – Polished chrome plate

The product is hand polished to a smooth mirrored finish. A bright nickel plate is then applied before a chromium plate is applied on top of the nickel.

Chromium plate provides a very durable and hard-wearing finish.

SNP – Satin nickel plate

The product is hand sateened to give a brushed satin finish. A dull nickel plate is then applied.

Nickel finish is less durable than chrome and as a result, is classed as a living finish which will oxidise over time.

Our finishes

SCP – Satin chrome plate

The product is hand sateened to give a brushed satin finish. A dull nickel plate is then applied before a chromium plate is applied on top of the nickel.

Chromium plate provides a very durable and hard-wearing finish.

NBP – Barrelled nickel plate

The product is hand sateened to give a brushed satin finish. The product is then lightly distressed. Finally, a dull nickel plate is applied to the product.

Nickel finish is less durable than chrome and as a result, is classed as a living finish which will oxidise over time.

HBN – Hand burnished nickel

The product is hand polished to a smooth mirrored finish. A bright nickel plate is then applied. The finisher then hand burnishes the product to achieve a natural looking aged appearance.

Nickel finish is less durable than chrome and as a result, is classed as a living finish which will oxidise over time.

ASP – Antique silver plate lacquered

The product is hand sateened to give a brushed satin finish. A silver plate is then applied before a bronzing powder is applied on top of the silver. The finisher then relieves the finish to give an antique silver finish.

Finally, a highly durable clear satin lacquer is then applied which is baked in our ovens to ensure the lacquer cures to offer lasting protection. Baking the lacquer ensures that a harder and more durable layer will protect the finish from day to day usage and oxidation.

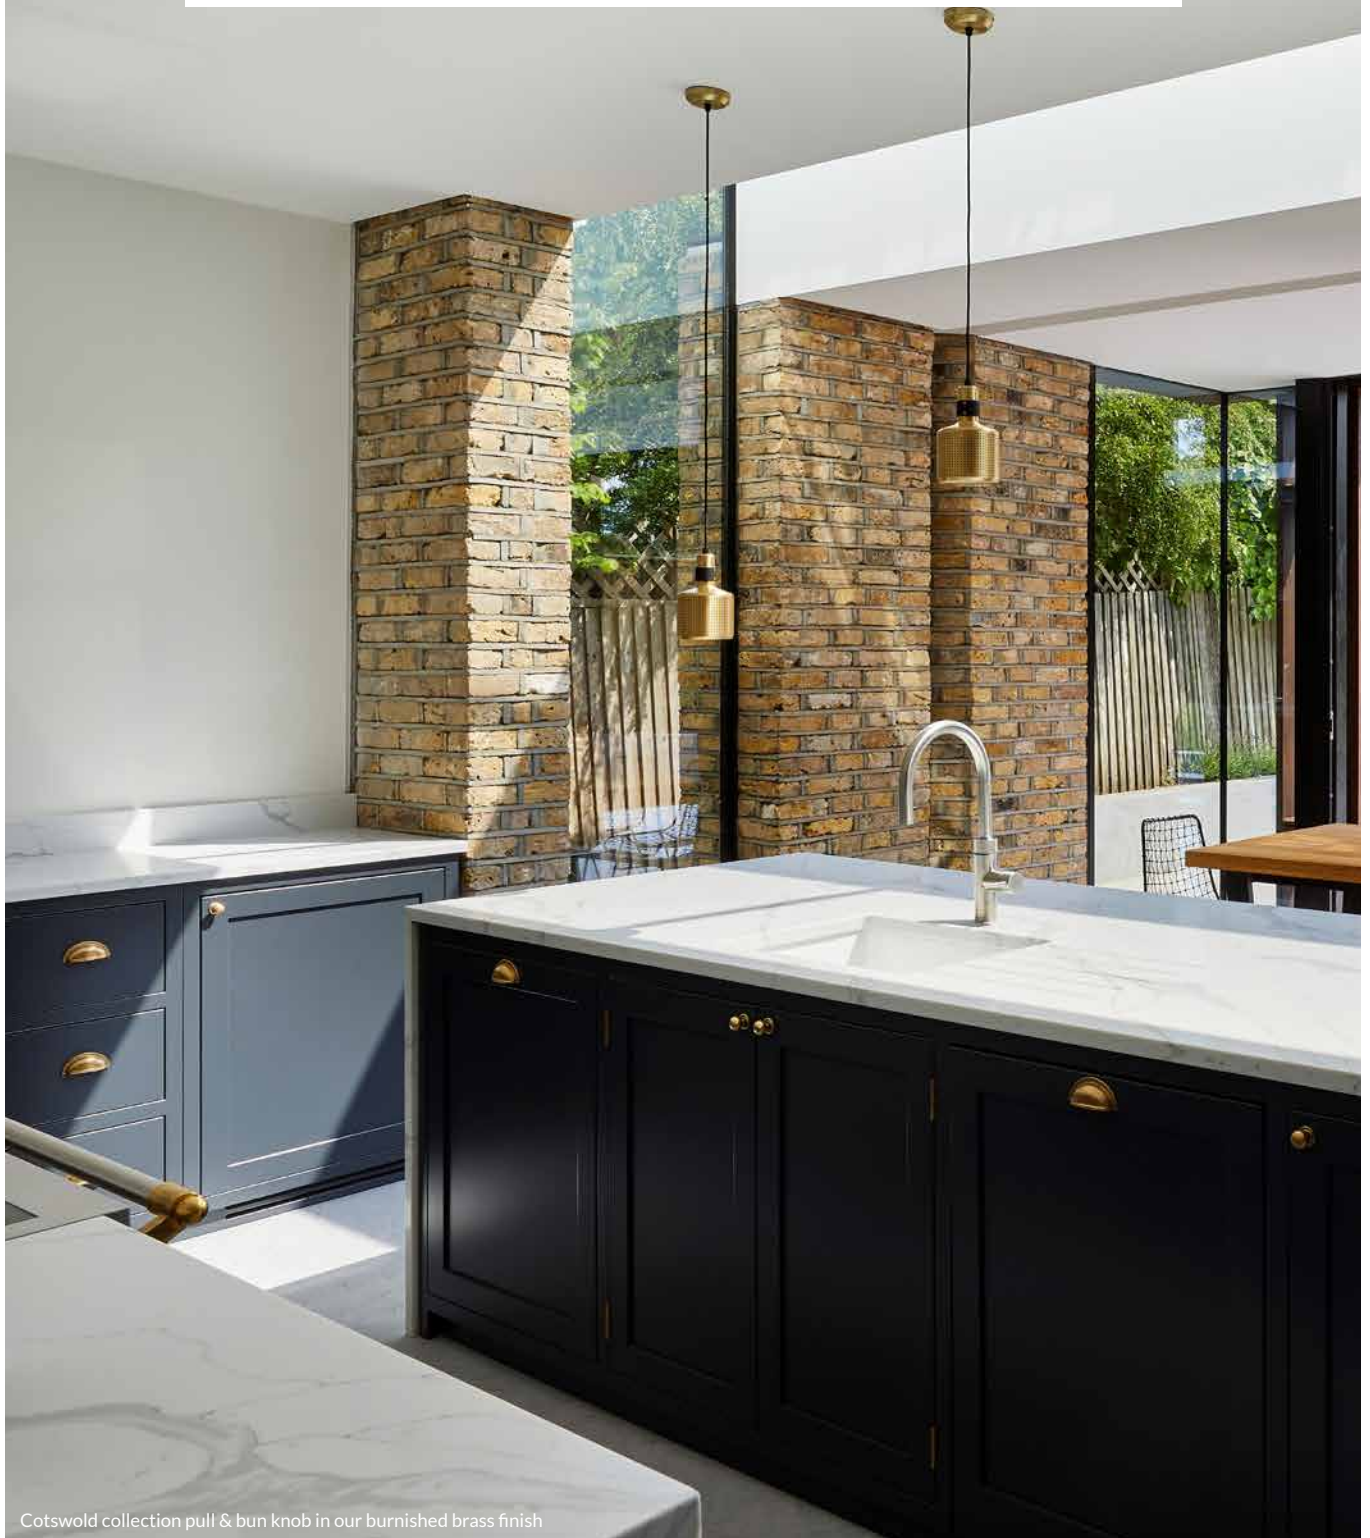

ACP – Antique copper plate lacquered

The product is hand sateened to give a brushed satin finish. A copper plate is then applied on top of the copper. The polisher then relieves the finish to give an antique copper finish.

Finally, a highly durable clear satin lacquer is then applied which is baked in our ovens to ensure the lacquer cures to offer lasting protection. Baking the lacquer ensures that a harder and more durable layer will protect the finish from day to day usage and oxidation.

Our collections

Cotswold collection pull & bun knob in our burnished brass finish

Designed to enhance your interior cabinetry and make every detail one to take note of, each of our luxury solid brass hardware collections is thoughtfully designed in-house. Producing the finest fixtures and fittings in an array of covetable styles, our collections promise to cater for every interior look imaginable. From minimal and modern to those inspired by times gone by like the art-deco era, discover over 35 exquisite collections to adorn your cabinets.

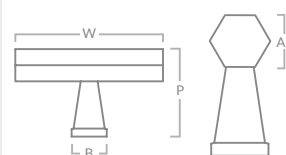

Crossways

Featuring stylish geometric shapes, Crossway is an exquisite collection of cabinet pulls, handles and knobs with a distinct art deco appeal. Designed and made in the heart of England, the Crossways collection of luxury brass hardware is an attractive option for both bedroom and living room furniture. Decorative and functional, the diverse ten-piece range ensures adding the final touches to your cabinets is effortless with over 20 finish options to choose from.

Croxford

Featuring angled edges and clean lines, the Croxford collection is a perfect choice to accent modern spaces. Linear in design and extruded to create a functional cabinet pull, Croxford handles are available in four sizes and made to order in Birmingham. The beauty of this understated design is that it transforms instantly depending on the finish you choose. From matt black for an industrial kitchen to polished nickel plate for a contemporary living room, explore over 20 signature finishes to find your desired look.

PULL HANDLES

Code	Length (L)	Centres (C)	Width (W)	Projection (P)
CRX/50	50mm	32mm	20mm	21mm
CRX/114	114mm	96mm	20mm	21mm
CRX/150	150mm	128mm	20mm	21mm
CRX/312	312mm	288mm	20mm	21mm

All product photographed in our burnished brass finish

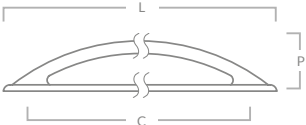

Bayonne

A minimalistic range of solid brass hardware, Bayonne complements contemporary spaces effortlessly. Featuring cabinet and appliance pull handles set flawlessly upon separate backplates, the sleek collection is perfect for modern bathroom and kitchen cabinets requiring an understated look and feel. In over 20 signature finishes, the Bayonne collection caters to all tastes with matt black, chrome and copper options all on offer.

PULL HANDLES

Code	Length (L)	Centres (C)	Base Width	Projection (P)	Bar Width

QUA/76	76mm	25mm	80mm

All product photographed in our satin antique satin lacquered finish

Photographed in our satin nickel plate finish

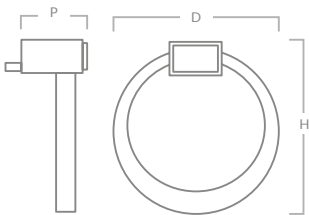

Oblique

A contemporary classic, Oblique features a solid brass circular ring pull handle in the three graduating sizes. Suited to bathrooms and wet rooms, each handle is CNC machined and assembled to allow for effortless installation on cabinet doors and drawers. With a contrasting square centre, the inner and outer circles of the ring create a subtle optical illusion and showcase a bold striking look against interior cabinets. Explore over 20 signature finishes to achieve your desired hardware look.
