## Hawthorn Hill ~~ARMAC~~ MARTIN

### CHROME

A shiny finish with a hint of blue for a classical or contemporary feel.

### MATERIALITY

Chrome is the hardest and most durable electroplated finish in situations with daily cleaning. It may be cleaned with water or mild soap and water and dried off afterwards. It is still prudent to avoid commercial cleaning products which may contain corrosive chemicals.

### FINISH WARRANTY

Perrin & Rowe and Hawthorn Hill products are manufactured in brass by craftsmen in its factory in England. Some minor imperfections in the materials and finish are not defects, but a feature of a handmade product.

Chrome finish is warranted against manufacturing defects for five (5) years from the date of purchase of product.

Paints continue to cure for a few days. Vapours released during this process can sometimes cause metal finishes to discolour or tarnish. It is best to wait until no paint odour can be detected before installing plumbing trim pieces.

This finishes warranty is voided by:

- Damage to finishes which arises from installation or post-installation use.
- Failure to observe manufacturer's care and cleaning instructions.
- Damage to finishes by adhesives, sealants, paint or any solvents used to remove them.
- Damage to finishes by use of unsuitable cleaning agents or improper materials contrary to the manufacturer's Care and Maintenance instructions. These include cleaning agents containing acidic, corrosive, abrasive, citrus or alcohol based substances or through scouring of a surface by abrasive cloths, sponge pads or similar.

Hawthorn Hill ARMAC MARTIN

### NICKEL

A shiny finish with a golden glow. If left, Nickel will develop an aged patina (similar to silverware) and an occasional polish will restore its original gleam.

### MATERIALITY

Nickel finish is known as a “living finish” which over time will develop a natural patina, giving it a distinctive classical look. Nickel requires regular care and it is important to dry off this finish after use.

Some water contains minerals that will leave deposits as water spots if allowed to dry on this finish. If this occurs, clean the fitting with soap and water and a soft cloth as above and occasionally give it a very light polish with Autosol (available from automotive suppliers) to restore the original sheen.

### NICKEL FINISH WARRANTY

Perrin & Rowe and Hawthorn Hill brassware products are manufactured in brass by craftsmen in its factory in England. Some minor imperfections in the materials and finish are not defects, but a feature of a handmade product.

Nickel finish is warranted against manufacturing defects for five (5) years from the date of purchase of product.

This finishes warranty is voided by:

- Damage to finishes which arises from installation or post-installation use.
- Failure to observe manufacturer’s care and cleaning instructions.
- Damage to finishes by adhesives, sealants, paint or any solvents used to remove them.
- Damage to finishes by use of unsuitable cleaning agents or improper materials contrary to the manufacturer’s Care and Maintenance instructions. These include cleaning agents containing acidic, corrosive, abrasive, citrus or alcohol based substances or through scouring of a surface by abrasive cloths, sponge pads or similar.

Paints continue to cure for a few days. Vapours released during this process can sometimes cause metal finishes to discolour or tarnish. It is best to wait until no paint odour can be detected before installing brassware.

## Hawthorn Hill ARMAC MARTIN

### PEWTER

Pewter is a brushed, satin Nickel finish to perfectly complement stainless steel sinks and appliances.

### CARE & MAINTENANCE

Pewter (brushed Nickel) finish is known as a “living finish” which over time will develop a natural patina, giving it a distinctive classical look. Pewter requires regular care and it is important to dry off this finish after use.

Some water contains minerals that will leave deposits as water spots if allowed to dry on this finish. If this occurs, clean the fitting with soap and water and a soft cloth as above and occasionally give it a very light polish with Autosol (available from automotive suppliers) to restore the original sheen.

### FINISH WARRANTY

Perrin & Rowe and Hawthorn Hill products are manufactured in brass by craftsmen in its factory in England. Some minor imperfections in the materials and finish are not defects, but a feature of a handmade product.

Pewter finish is warranted against manufacturing defects for five (5) years from the date of purchase of product.

Paints continue to cure for a few days. Vapours released during this process can sometimes cause metal finishes to discolour or tarnish. It is best to wait until no paint odour can be detected before installing plumbing trim pieces.

This finishes warranty is voided by:

- Damage to finishes which arises from installation or post-installation use.
- Failure to observe manufacturer's care and cleaning instructions.
- Damage to finishes by adhesives, sealants, paint or any solvents used to remove them.
- Damage to finishes by use of unsuitable cleaning agents or improper materials contrary to the manufacturer's Care and Maintenance instructions. These include cleaning agents containing acidic, corrosive, abrasive, citrus or alcohol based substances or through scouring of a surface by abrasive cloths, sponge pads or similar.

## Hawthorn Hill

### GOLD

This finish, made with real gold, will give a luxurious look that lasts.

### CARE & MAINTENANCE

Gold plated products contain real Gold in the coating and being the softest finish, should be treated as you would treat any piece of fine jewellery. They should only be cleaned with warm water and a mild pH-neutral liquid soap and dried with a chamois leather cloth. Gold plating can be scratched and discoloured by perfumes contained in some soaps and lotions and the finish on a frequently used fitting may over time wear on the handle where it is frequently touched.

### FINISHES WARRANTY

Perrin & Rowe Hawthorn Hill products are manufactured in brass by craftsmen in its factory in England. Some minor imperfections in the materials and finish are not defects, but a feature of a handmade product.

Due to the greater level of care and maintenance required, Perrin & Rowe's Gold finish is warranted against manufacturing defects for a period of two (2) years from the date of purchase.

Paints continue to cure for a few days. Vapours released during this process can sometimes cause metal finishes to discolour or tarnish. It is best to wait until no paint odour can be detected before installing plumbing trim pieces.

This finishes warranty is voided by:

- Damage to finishes which arises from installation or post-installation use.
- Failure to observe manufacturer's care and cleaning instructions.
- Damage to finishes by adhesives, sealants, paint or any solvents used to remove them.
- Damage to finishes by use of unsuitable cleaning agents or improper materials contrary to the manufacturer's Care and Maintenance instructions. These include cleaning agents containing acidic, corrosive, abrasive, citrus or alcohol based substances or through scouring of a surface by abrasive cloths, sponge pads or similar.

Hawthorn Hill ARMAC MARTIN

### POLISHED BRASS

As a living finish, the initial polished appearance of brass will mature over time to develop a patina and unique character reminiscent of old brassware. We recommend this finish for outdoor kitchens & shower areas, particularly in coastal areas.

Uncoated bare brass is becoming increasingly popular as the selected finish for kitchen and bathroom fittings.

When left uncoated, high quality brass develops a golden patina which complements natural coastal elements and organic stones like granite, marble and limestone. Uncoated bare brass can become a feature in exposed situations such as al fresco kitchens and for outdoor showers at beach houses.

### MATERIALITY

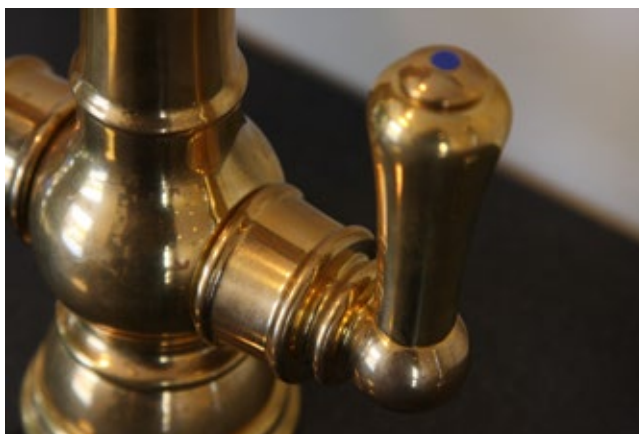

Perrin & Rowe and Hawthorn Hill products are manufactured in brass by craftsmen in its factory in England. Some minor imperfections in the materials are not defects, but a feature of a handmade product.

Both the Polished Brass from Perrin & Rowe and Hawthorn Hill is uncoated brass (which means there is no finish warranty, as there is no finish) which has been buffed to a shiny finish.

### CARE & MAINTENANCE

Over time, polished brass will garner a patina and the surface lose some of its brightness. Brass fittings can be cleaned routinely with mild soap and water which will not alter the patina development.

If desired the shine can be restored with a very mild abrasive cleaner like Brasso (some supermarkets) or Autosol Metal Polish (from an automotive product supplier such as Repco Ltd or some hardware stores).

# Hawthorn Hill

### SATIN BRASS

Satin brass (uncoated bare brushed brass) is our latest finish for tapware, towel warmers, basin stands and accessories.

The brass product is left uncoated, celebrating the warm and tactile raw material which is hand buffed to a satin finish.

As a living finish, the surfaces respond to the environment, developing a rustic honesty without losing any functionality. The appeal of brass tapware and fittings as an organic element in kitchens and bathrooms is the very process of aging; paradoxically the resulting patina gives a beautiful and ageless look.

Brass has endured for centuries and in its updated forms will continue to enchant for years to come.

### MATERIALITY

Perrin & Rowe and Hawthorn Hill products are manufactured in brass by craftsmen in its factory in England. Some minor imperfections in the materials are not defects, but a feature of a handmade product.

Satin Brass from Perrin & Rowe and Hawthorn Hill is uncoated brass (which means there is no finish warranty, as there is no finish).

### CARE & MAINTENANCE

Satin Brass from Perrin & Rowe and Hawthorn Hill has a brushed surface which reduces the gleam on the surface. A brushed finish is more susceptible to staining or marks from chemicals or acids as the surface has small 'scratches' which pick up the stain. Therefore -

Ensure the plumber uses clean hands or gloves when installing the tap and washes off any plumbing product. Ask him to cover the tap if it is installed before the room is finished to avoid splatters from paint or commercial cleaning products.

Establish a simple routine of rinsing off the tap with warm water and drying it, if it is spattered with cooking acids or chemicals such as toothpaste.

If uneven staining occurs, this finish can be refurbished when dry with a gentle abrasive cloth - such as a non-scouring cleaning pad (eg. Scotchbrite) or if requiring more abrasion a 320 grit sanding sponge (3M is one brand) which can be purchased from Bunnings or another hardware outlet. If the surface is polished with a metal polish this will reduce the brushed effect.

### ENGLISH BRONZE

If you're after a rich unique style look no further than the Perrin & Rowe English Bronze finish.

Available throughout the Perrin & Rowe Classical collection, this smooth satin finish will set any project apart from the masses.

The selection of finish for your tapware and accessories is a matter of personal taste and will depend upon the style of house and the interior design aspects of colour, cabinetry design, appliances and fittings. Care may be needed to ensure compatibility with other kitchen appliances in close proximity, such as a stainless steel sink or refrigerator.

The thickness of all plated finishes far exceeds the required depth, providing superior appearance and longevity.

### MATERIALITY

English Bronze is a unique finish developed for the American market. The product is a smooth matte baked resin finish over brass body.

### ENGLISH BRONZE FINISH WARRANTY

Perrin & Rowe products are manufactured in brass by craftsmen in its factory in England. Some minor imperfections in the materials and finish are not defects, but a feature of a handmade product.

Due to the greater level of care and maintenance required, Perrin & Rowe's English Bronze finishes is warranted against manufacturing defects for a period of two (2) years from the date of purchase.

Paints continue to cure for a few days. Vapours released during this process can sometimes cause metal finishes to discolour or tarnish. It is best to wait until no paint odour can be detected before installing plumbing trim pieces.

This finishes warranty is voided by:

- Damage to finishes which arises from installation or post-installation use.
- Failure to observe manufacturer's care and cleaning instructions.
- Damage to finishes by adhesives, sealants, paint or any solvents used to remove them.
- Damage to finishes by use of unsuitable cleaning agents or improper materials contrary to the manufacturer's Care and Maintenance instructions. These include cleaning agents containing acidic, corrosive, abrasive, citrus or alcohol based substances or through scouring of a surface by abrasive cloths, sponge pads or similar.

## The Finishes

Perrin & Rowe offers New Zealand designers and home owners a wide selection of premium quality finishes. The classical collection is available in chrome, nickel, pewter, gold, and English bronze finishes. The contemporary collection is available in the chrome and pewter finishes. All taps are also available in satin or polished uncoated bare brass by special order.

**Chrome:** A shiny finish with a hint of blue for a classical or contemporary feel.

**English bronze:** A satin, rich chocolate brown finish for a bold, distinctive look.

**Nickel:** A shiny finish with a golden glow. If left, nickel will develop an aged patina similar to silverware, with the occasional polish restoring its original gleam.

**Satin brass:** This is uncoated bare brass brushed for a satin look. Brass oxidises over time to gain a characteristic patina.

**Pewter:** A satin (brushed) nickel finish which is the perfect complement to stainless steel sinks and appliances.

**Polished brass:** This is uncoated bare brass with a smooth polished finish. Brass oxidises over time to gain a characteristic patina.

**Gold:** This finish, which contains real Gold, will give a luxurious look.

## Handle Options

Perrin & Rowe allows further customisation of the classical range, offering black glazed porcelain lever and handle inserts, as well as inserts in all of the Perrin & Rowe metal finishes.

**White porcelain detailing:** This is standard across the classical range.

**Matching metal detailing:** Available as a custom option across the classical range, to replace all porcelain parts including handshower handles.

**Black porcelain detailing:** Available as a custom option across the classical range, to replace all porcelain parts including handshower handles.

**Provence style handle:** Available as a custom option across the classical range, to replace classical handle hoods and levers.

## Made In England

Hawthorn Hill product is designed, manufactured and assembled in its own factory in England.

## Finishes

Hawthorn Hill towel warmers and basin stands are finished to the highest quality. We closely match Hawthorn Hill finishes to suit each Perrin & Rowe finish, for consistency throughout projects.

Chrome Finish:

Polished Nickel Finish:

Pewter Finish:

Gold Finish:

Satin Brass:

Uncoated Bare Brass:

Oil Rubbed Bronze Finish  
(Exclusive to Hawthorn Hill products: A liquorice toned rubbed finish with a hint of copper highlights)

# Hawthorn Hill

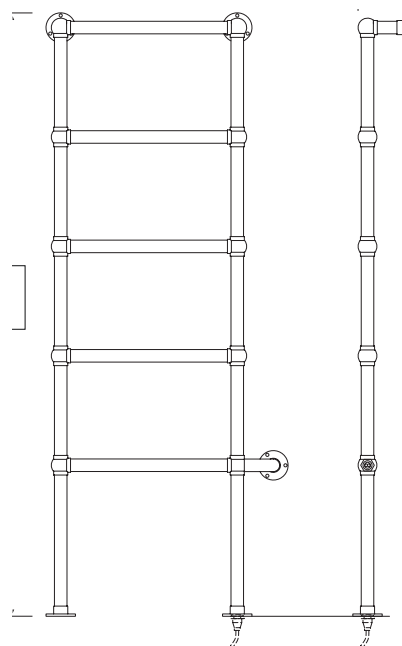

## Custom designing towel warmers and basin stands

One of the most notable and exciting features of the Hawthorn Hill brand is the ability to customise their products to the exact needs of a project. This is a value-added service which discerning clients will appreciate.

As each item is manufactured to order, we can adjust the height, width, depth and number of rails/legs to suit your project. All basin stands can be made to suit a particular basin or vanity top size. The production and delivery time from England is up to 8 weeks. For more information, please discuss with a member of our friendly sales team.

## The options for bespoke production include:

- Unique height and width of the overall unit. This allows the client to ensure that the wall mountings are exactly in line with panelling or tiles
- More or fewer horizontal bars
- More or fewer detailed ball joints
- Multiple options for element positioning
- Production without element fittings at all
- Production without screw holes in the mounting plates - freestanding arched model only
