THE STORY OF A LIFE WELL CRAFTED™

We believe distinctive stories are what make life exceptional. The discovery of time-honoured craft opens the door to stories unlike any other. Stories of place and provenance. Stories of dedication and passion. Stories of artistry and heritage.

Through Perrin & Rowe, you will find countless stories in every detail. And the closer you look, the more you will see the details of your own story. A story of a life well crafted.

WHY CHOOSE OUR TAPS?

PERRIN & ROWE[®]
L O N D O N

WHY CHOOSE PERRIN & ROWE TAPS?

Perrin & Rowe kitchen and bathroom tapware reflects a harmony of beautiful design and well-planned functionality which is why they're specified by top designers and architects around the world. Their commitment to performance and durability ensures every tap is built to last a lifetime.

PROVENANCE

All Perrin & Rowe tapware is designed and manufactured exclusively in the United Kingdom.

PRECISION ENGINEERING

Each kitchen tap is precision engineered from high quality brass, hand assembled, and rigorously tested. All kitchen spouts rotate 360°.

MATERIALITY

Perrin & Rowe taps are still made from solid brass, unlike some modern tapware that is made from chrome coloured plastics or aluminium alloys. Brass has proven to be the ultimate material for tapware, withstanding years of constant use and temperature variation without cracking or distortion.

WE OFFER A RANGE OF STYLES

Perrin & Rowe have developed their tapware collections over decades resulting in an elegant and timeless offering. Available with lever handles or crosshead handles, in Traditional, Langbourn and Country styles, we have the perfect tapware to suit your style of home.

CERAMIC DISC VALVES

Perrin & Rowe kitchen taps feature hard-wearing ceramic, quarter-turn valves for a smooth on/off action and are fitted with aerators to promote a softer, splash-free flow of water.

HIGH OR LOW WATER PRESSURE

Our tapware is suitable for low and high water pressure, and meets the highest standards. For more information see page 87.

EXPERT GUIDANCE

Your taps will be the most utilised piece of equipment in your home so choosing the perfect kitchen and bathroom tapware is an important decision.

Our expert consultants can help you choose the right tapware for your project. Visit us in store at our showroom in Auckland or view our collection online and email us your wish-list.

We are always happy to help.

Your tapware is one of the most important components of your home. Invest in the best.

FINISHES & HANDLES

PERRIN & ROWE[®]
L O N D O N

FINISHES

Like the finest jewellery, Perrin & Rowe tapware has an exacting sense of proportion. We believe the best way to make together the foremost in innovation with time-tested techniques. Crafted in England, Perrin & Rowe designs reinterpret the past with the technology of the present.

CHROME - CP

A shiny finish with a hint of blue for a Traditional or contemporary feel.

NICKEL - NI

A shiny finish with a golden glow. If left, nickel will develop an aged patina similar to silverware, with the occasional polish restoring its original gleam.

PEWTER - PF

A brushed nickel finish which is the perfect complement to stainless steel sinks and appliances.

POLISHED BRASS - BR

This is uncoated bare brass with a smooth, polished finish. Brass oxidises over time to gain a characteristic patina.

SATIN BRASS - SB

This is uncoated bare brass brushed for a satin look. Brass oxidises over time to gain a characteristic patina.

GOLD - IG

This finish, which contains real Gold, will give a luxurious look.

HANDLE OPTIONS

Perrin & Rowe allows further customisation of the Traditional and Country lever handled tapware. Please enquire.

WHITE PORCELAIN:

Standard across the Perrin & Rowe Traditional kitchen and bathroom collections.

BLACK PORCELAIN:

Available as a custom option across the Perrin & Rowe Traditional kitchen and bathroom collections.

SPRAY RINSE TAPS

PERRIN & ROWE[®]
L O N D O N

Perrin & Rowe's spray rinse kitchen taps are popular and highly functional fittings that make light work of washing the dishes, rinsing vegetables, or filling pots and vases. The durable 1.2m hose offers virtually unrestricted use, even on a large sink.

Perrin & Rowe's patented spray rinse is operated using a sophisticated diverter mechanism which forms part of the body of each spray rinse tap. Turn on the tap to the desired mix of hot and cold water, then press the button on the spray rinse to divert the flow to the rinse. Water will cease to flow from the spout of the tap when the spray button is engaged.

Each precision engineered spray rinse handle is designed to complement the style of its accompanying tap. By keeping the spray handle distinct from the tap itself, Perrin & Rowe's iconic kitchen tap designs remain intact and are enhanced by this stylish and useful addition.

These taps require incoming water pressure higher than 100kPa (this is to ensure complete diversion from the tap to the spray rinse) and lower than 500kPa.

NOT JUST FOR KITCHEN...

PERRIN & ROWE[®]
L O N D O N

The Mayan taps are timeless and iconic in their simplicity.

They are outstanding in beauty and function in kitchens, bathrooms and laundries with unequal water pressure.

Use in the kitchen as a pair of taps or beside the Ionian kitchen tap when used singly as a filtered water tap.

In the bathroom, they work perfectly behind a vessel basin.

Add a pair to your laundry and make household duties more enjoyable.

POT FILLERS

L O N D O N

A style statement for your kitchen, these exquisite Perrin & Rowe taps show everyone you love your kitchen. Dispensing water directly into pots and preserving-pans whilst on the stove, the arm extends easily over front or rear elements with a convenient reach of 590mm, before seamlessly folding away after use. A cook's dream!

Encompassing a quarter-turn shut off valve at the wall, the pot filler is highly functional and available in all Perrin & Rowe finishes. The porcelain lever is offered in timeless black and white colourways and can be substituted for metal to complement the tap if desired.

Created especially for our local market, the Perrin & Rowe pot fillers comply with WaterMark standards. Easily installed with concealed fixings, measure the desired height above your tallest pot on your stove top and direct your plumber to connect to a cold-water supply.

ORDERING

WHY PURCHASE PERRIN & ROWE MADE FOR NEW ZEALAND?

In Residence is the dedicated distributor of Perrin & Rowe tapware in New Zealand, with our own showroom in Auckland and a network of resellers around the country.

For more than 30 years, In Residence has worked closely with the Perrin & Rowe product designers and manufacturing team in England to design and supply products specifically for New Zealand homeowners and designers.

Whilst the visual appearance of Perrin & Rowe taps sold in other countries is visually similar to those made for New Zealand, many aspects are quite different. Perrin & Rowe taps produced for other countries are neither compatible with New Zealand plumbing fittings nor made in compliance with New Zealand Standards and plumbing regulations. A Registered Plumber cannot therefore install them into a New Zealand home.

Purchasing Perrin & Rowe products from In Residence ensures you receive goods that are made for New Zealand and meet our standards and regulatory requirements.

In Residence provides a five year warranty on all Perrin & Rowe tapware, accessories and bathroomware which it imports and sells in New Zealand. Privately imported product has no warranty here.

SPECIFICATION

Use our website www.inres.co.nz/brands/perrinandrowe to access Specification Sheets, CAD and to create 'MY LIST' of products for your project. Submit it to us for consultation and we will contact you promptly to consult on your selection, provide a quote valid for 30 days, advise on stock availability and progress your project further.

To confirm your order, we require a 50% deposit to secure stocked items and 100% payment for made-to-order items. All goods must be paid for in full prior to dispatch. For partial dispatches, additional payments may be required depending on delivery schedule.

DELIVERY TIMES

There is no stock warehouse at the Perrin & Rowe factory in England with every product they sell made to order. In Residence endeavours to maintain a consistent level of stock of regularly sold items. If a Perrin & Rowe product is not in stock in our warehouse, the manufacturing time is generally about eight to ten weeks.

Please discuss stock availability with the In Residence sales team when considering the supply timeline for your project.

RETURNS

Purchased Perrin & Rowe products will be considered for return by In Residence for a period of up to three months after the invoice date. In the event that In Residence agrees to accept a return, a 20% restocking fee may apply. Any product presented for return and/or credit must be unused and in saleable condition, including its original packaging. The packaging must be unmarked and free from labels. Failure to comply with these conditions may result in the return being declined. The cost of return delivery is to be covered by the returner.

FREIGHT CHARGES

There is no freight charge for tapware and accessories from our business to an urban business address within New Zealand. Rural delivery addresses may be subject to a freight contribution.

Please contact In Residence for further information prior to ordering.

YOUR ORDER

FREIGHT RATE GUIDE	Auckland	North Island*	Upper South Island*	Lower South Island*	To a rural address per delivery
Tapware & Accessories	Free	Free	Free	Free	Additional charges may apply
Sinks, basins, toilets, basin stands, mirrors & towel warmers	\$220	\$300	\$400	\$500	Additional charges will apply
Baths	POA	POA	POA	POA	POA

***North Island** includes Cambridge, Gisborne, Hamilton, Hastings, Napier, New Plymouth, Palmerston North, Rotorua, Taupo, Tauranga, Thames, Wellington, Whangarei.

Upper South Island includes Ashburton, Blenheim, Christchurch, Nelson.

Lower South Island includes Dunedin, Gore, Greymouth, Invercargill, Oamaru, Timaru, West-port, Queenstown.

NOTE: Freight rates based on a consignment size & weight not exceeding 1m³ & 200kg

INSTALLATION & WARRANTY

INSTALLATION GUIDES

Perrin & Rowe installation guides are included in all product boxes.

LOW WATER PRESSURES

Perrin & Rowe taps are compatible with most low water pressure installations. To support water conservation regulations, Perrin & Rowe kitchen and basin taps are fitted with a flow controlling spout tip aerator. This limits the water output to 6 to 7.5 L/min to give a WELS Four Star rating. This flow rate is based on taps installed into homes with an incoming pressure of 150 to 500 kPa.

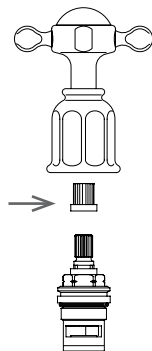

When Perrin & Rowe kitchen and basin taps are installed into homes with low inlet water pressure of less than 150 kPa, we can change the spout tip aerator to a non-flow controlled version. We can also work with your plumber for unequal hot and cold water pressures.

The single lever shower mixers N5506, N5106 and N5806 require at least 100 kPa to operate their internal pressure balancing valve. Please contact In Residence for advice on low-water pressure installations.

Kitchen taps with a spray rinse requires a minimum inlet water pressure of 100 kPa to activate their diverter mechanism. They will work on lower pressures but water will simultaneously flow from the tap spout and rinse.

HANDLE ALIGNMENT

At Perrin & Rowe every detail counts. Every ceramic disc valve in a Perrin & Rowe product has an acetal handle alignment vernier positioned between the spindle of the valve and the spline of the handle. This vernier allows fine-tuning of the handle position during assembly and installation, for perfect handle orientation.

WARRANTY FOR MANUFACTURING DEFECTS

Perrin & Rowe tapware has a five (5) year warranty against manufacturing defects.

WARRANTY FOR CONSUMABLE COMPONENTS

Ceramic disc cartridges incorporated within Perrin & Rowe tapware are a consumable item and have a parts replacement warranty for five (5) years from the date of original purchase of the tap. This consumable components warranty provides for the supply of replacement cartridges during this period.

Flexible inlet hoses, handshower and kitchen tap spray rinse hoses, O rings and washers, non-return valves, poppet valves and aerator inserts are also consumable components and covered by a five (5) year parts replacement warranty from the date of purchase. This warranty excludes damage caused by misuse, improper installation or vandalism.

COMPLIANCE: LEAD FREE, WATERMARK AND WELS

WHY THESE LABELS ON YOUR TAPWARE MATTER... MORE THAN YOU MIGHT THINK:

At first glance, the labels on taps or showerheads might seem like an afterthought. But when it comes to your health, wellbeing, and the efficiency of your home, they matter more than you might realise.

Certification marks like WaterMark and WELS are more than bureaucratic requirements - they're signs that the tapware in your home has been independently assessed for safety, performance and sustainability.

YOUR WELLBEING BEGINS AT THE TAP

Water is one of the most intimate parts of our daily routine. We drink it, cook with it, bathe our children in it - and trust it implicitly.

Behind the craftsmanship of every Perrin & Rowe tap is a foundation of engineering that supports both your wellbeing and the environment.

NEW ZEALAND STANDARDS

Perrin & Rowe tapware imported by In Residence meets the performance requirements of the tapware standard: **AS 3718:2021 Water Supply - Tapware.**

The kitchen and basin taps are certified with the Lead-Free WaterMark, and this WaterMark certification is recognised in New Zealand by New Zealand Ministry of Business, Innovation and Employment (MBIE) with its inclusion In Building (Product Recognition WaterMark Tapware) Notice 2025: RN-10009

WELS: WATER EFFICIENCY LABELING AND STANDARDS

The New Zealand Government's Water Efficiency Labelling & Standards (WELS) scheme is designed to reduce water consumption and applies to kitchen taps, basin taps, showers and toilets, as well as other water using appliances.

All Perrin & Rowe kitchen and basin taps, shower outlets sold by In Residence comply with WELS requirements.

WATERMARK: THE PLUMBING SAFETY STANDARD

The WaterMark Certification Scheme is New Zealand's baseline for plumbing product safety. It ensures that fittings have been independently tested and certified to meet national performance standards.

If a product doesn't carry this mark, it cannot legally be installed by a licensed plumber - no matter where you buy it. It's your first assurance that what's behind the walls and under the sink is safe, durable and fit for purpose.

All Perrin & Rowe products comply with:

WaterMark scheme: Licence WMKA02818

New Zealand standards:

Tapware: AS 3718:2021

Showers: AS 3662:2013

NEW LEAD FREE WATERMARK

As part of global health concerns in the Western world, from 1 May 2026 the New Zealand National Construction Code (NCC) requires all tapware used to convey drinking water to meet strict low-lead requirements and to be certified under the new Lead-Free WaterMark.

This certification confirms that copper alloy components in kitchen and basin tapware contain no more than 0.25% lead by weighted average across all wetted surfaces, aligning New Zealand regulations with the international standard. **Perrin & Rowe's UK factory has already made the 2026 Lead-Free transition**, having reformulated the brass alloys to meet low-lead thresholds without compromising on quality or finish. This proactive shift ensures that all Perrin & Rowe kitchen and basin taps destined for New Zealand homes meet the new standards. All products shown in this catalogue are compliant for the NZ market.

It's important to note that the new rule **only applies to tapware used to convey drinking water**. The scope of these new requirements is comprehensive, encompassing all copper alloy plumbing products that come into contact with drinking water. Products falling within this new requirement include kitchen and basin taps, mixers, plumbing fittings, drinking fountains, water filter systems, ice makers, water heaters, boiling water tanks and taps, and units dispensing chilled and carbonated water. Products like bath taps, showerheads, dishwashers, and emergency fittings are exempt under these new guidelines.

YOUR BUILDING CONSENT TRANSITION PERIOD

Manufacturers have had the last three years to prepare to comply with the new requirements. Now all plumbing products coming into contact with drinking water which are installed after 1 May 2026, must comply with the new lead-free requirements.

In New Zealand Ministry of Business, Innovation and Employment (MBIE) have given the following instructions:

The information below explains how the transition period end date should be applied.

Consents granted before the transition period ends: For building consents granted by a building consent authority (BCA) on or before 1 May 2026 (including consented projects under construction), the building work may proceed using the acceptable solution provisions that were approved by the building consent.

Consent applications made before the transition period ends: Building consent applications that have been made on or before 1 May 2026 may continue to comply with the acceptable solution provisions that were in place on the date the consent application was made.

Consent applications made after the transition period ends: Building consent applications made on or after 2 May 2026 must follow the updated provisions when using the acceptable solutions as a means of compliance.

Building work that does not require a consent: For building work exempt from requiring a building consent under Schedule 1 of the Building Act 2004, the person who carries out the work (e.g. the plumber) is responsible for ensuring that the products and methods used in carrying out the work comply with the requirements that are in effect at the time of installation.

LEAD-FREE WATERMARK CERTIFICATION DOCUMENTATION

Certified compliance with the new regulations will be evidenced by a new Lead Free WaterMark logo on the product and packaging and listed as Lead Free on their WaterMark Schedule.

When specifiers, interior designers, architects, consumers, tradesmen etc. are selecting plumbing products for future projects, they should request copies of a brand's WaterMark and Lead Free WaterMark certification schedules to ensure the selected product can be legally installed.

Suppliers should host their WaterMark and Lead Free WaterMark schedules on their websites or provide them on request to enable specification of their products. Specifiers should include these WaterMark and Lead Free WaterMark certification schedules within their project documentation.
