Hawthorn Hill

Luxury Detailing

Hawthorn Hill offers luxury detailing throughout the bathroom with its range of hand-crafted brassware.

Handmade in England from premium brass, each piece is carefully engineered, assembled and finished by craftspeople who understand artisan manufacture.

Hawthorn Hill fittings are definitive luxury detailing in any bathroom. These beautiful pieces will be desired for their functionality and aesthetics today, and treasured tomorrow.

A bespoke service is available. We can adapt some models using your custom specification to suit the particular needs of a project or we can help you create something unique.

OUR OFFERING

Towel Warmers

Designed and hand-crafted in England, Hawthorn Hill towel warmers represent the finest in workmanship, creating feature heritage pieces for the most prestigious homes.

Available in a selection of quality finishes, these heated towel rails will impart a wealth of style and functionality. Each of these 240V electric towel rails come with concealed mounts for a seamless installation and are supplied with a 6m dry-line electrical cable. They are IP55 rating for compliant use in Australian and New Zealand bathrooms.

Basin Stands

Hawthorn Hill offers basin stands designed and hand-crafted in England to fit under benchtops or our selection of basins. We offer a range of standard sizes in Ornate, Traditional or Contemporary styles with stepped, ball or pointed feet. These have been paired with the best quality English made basins we can find; from The Water Monopoly. For additional storage of towels or baskets you may upgrade to a tubular shelf beneath your stand.

For a truly personal touch to your bathroom or dressing room, consider a made-to-order stand. We can customise to any length, height and depth you require.

Accessible bathrooms: We can offer custom design solutions for accessible bathrooms too. Just ask one of our team.

Grab Rails

There is a strong likelihood that at some time in our life our mobility - or that of a friend or relative - will be compromised. In the event this disability is permanent, affecting ambulation and transfers within the home, support rails become a necessity.

Hawthorn Hill's Grab Rail Collection now delivers the opportunity to add this support, without compromising interior aesthetics. They are available as either straight rails or L-shaped left or right-handed designs, in Contemporary, Traditional and Ornate styling.

Hawthorn Hill grab rails are tested for compliance with the Australasian Standard for Access and Disability, ready for installation into Australian and New Zealand homes.

They are moisture resistant, allowing them to be placed in showers and over baths, where they are most needed. They can be earthed to reduce static and electricity build-up, a requirement when fitted in wet areas.

OUR OFFERING

Mirrors

With fully customisable sizes and a range of finishes these premium quality mirrors can be a true reflection of you.

British-designed and manufactured in brass, Hawthorn Hill mirrors are available in a range of polished and satin finishes; a beautiful choice for any bathroom, dressing room or bedroom.

Framed wall mirrors are available fixed or tilting in Classic or Deco styles. Tilting mirrors and vanity mirrors great for people of different heights using same bathroom.

Shaving Cabinet Mirror

We offer a shaving cabinet version of the fixed mirror that may be flush-mounted on the wall and have a custom joinery built in behind. We can provide these early on in the project to your joiner for fitting.

Vertical Robe Warmers

Following in the footsteps of the Hawthorn Hill towel warmers, the new vertical robe rails ensure luxuriously warm robes and towels while also allowing flexibility of installation in a bathroom with tight wall spaces. The brass hooks rotate to allow fine adjustment by the homeowner.

These robe warmers which are designed and hand-crafted in England are available in Ornate, Traditional and Contemporary styles and come as single vertically installed rails. The vertical bar is heated with a 240V dry-line cable. They are also IP55 rating for compliant use in Australian and New Zealand bathrooms.

Bath Stands & Accessories

Made from the highest quality brass, every Hawthorn Hill bathroom accessory is soldered, plated and polished by hand, which means you can be assured of the highest quality product.

The Hawthorn Hill bathroom stands are perfect for powder rooms and bathrooms where you require simple storage. They are also just the right height to sit beside the bath with a book, candle and glass of bubbles.

Each bath stand is designed and hand-crafted in England in two sizes. They feature 19mm lathe turned tubular legs, toughened glass shelves, guard rails on the top shelf, and adjustable stepped feet to accommodate uneven floors.

TOWEL RACK
HHCA600-850N

BISCAYNE

Kate Walker used our custom design service to create the vanity of her dreams for the Biscayne master ensuite. Hawthorn Hill custom-sized polished brass basin stand was designed to the width of the room, with gorgeous detailing of traditional ball joints and ball feet beneath the Amazonia stone benchtop.

BISCAYNE

The powder room is sheer frivolity and fun with Gucci Heron wallpaper. Featuring The Water Monopoly curved Paris basin on a Hawthorn Hill brass stand alongside pretty accessories and tapware by Perrin & Rowe, the interior echoes the whimsical flamboyance of regency style Floridian homes.

PONSONBY VILLA

Abbey Lang loves the raw brass and patina of our brass towel warmers and basin stands paired alongside Rockwell taps.

The soft, rich palette of Moroccan zellige tiles, Tundra Grey stone and raw brassware celebrates natural materiality, while the Shaker-style joinery embraces the villa's heritage.

EPSOM BUNGALOW

A hundred-year-old 'transition villa' has been sensitively updated to include a stunning guest bathroom with twin wash stations—each with a Hawthorn Hill round tilting mirror, Perrin & Rowe tap and basin set above a Hawthorn Hill traditional chrome basin stand with ball feet. The two single basin stands are joined by a single benchtop, and a bank of drawers in between provides ample storage for all bathroom necessities.

CAPE SCHANCK

The spacious, modern Master Ensuite features traditional 'his & hers' brass Hawthorn Hill vanities, Perrin & Rowe tapware, and a Victoria & Albert Amiata bath, all set on the gorgeous polished concrete floor that runs throughout the home.

The guest bathrooms are a simplified version of the master, each with a single Hawthorn Hill basin stand and each with their own sweet colour scheme.

FINCH STREET

This light-filled, modern bathroom is a joyful interplay between tiled surfaces, The Water Monopoly Rockwell bath and Italia Grigio terrazzo floor tiles with marble chip aggregate.

The Water Monopoly Rockwell basin on a Hawthorn Hill stand in polished brass with black ball feet draws your attention to the eye-catching stone once more, while an entire wall of cabinetry opposite does the heavy lifting regarding storage.

SPEARGRASS HOUSE

Designed by New Zealand architects Sumich Chaplin, with interiors by Sydney-based Arent & Pyke, this stunning project is a collaboration that has won acclaim on both sides of the Tasman.

Each of the bathrooms in the home features walls stacked in travertine, glazed tiles, and marble. The layers of texture convey a soft sensuality enhanced by the gentle flicker of sunlight upon their surfaces. To add warmth and functionality, Hawthorn Hill arched and wall towel warmers were included in each of the bathrooms.

INSTALLATION
GUIDES

FIXED WALL MIRRORS INSTALLER'S GUIDE

STEP BY STEP FIXED WALL MIRROR INSTALLER'S GUIDE

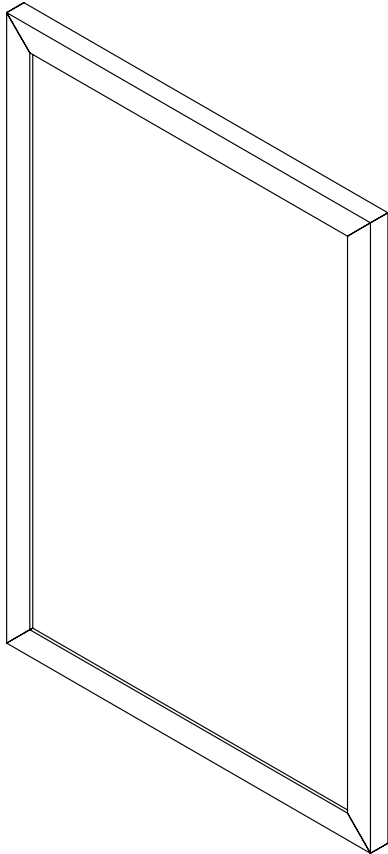

Sophisticated edges, quality UK engineering and a range of styles make our latest offering of Hawthorn Hill mirrors a superior choice.

The fixed mirrors are framed in brass, and are designed to be flush-mounted on the wall in either portrait or landscape orientation.

BEFORE YOU BEGIN

STEP 1: INSPECT THE MIRROR

Unpack the mirror carefully and remove it from its box. Remove the packaging from the mirror and ensure it is the model and size you require for this installation. Check the mirror for any sign of damage. If it is not the correct mirror or there is any sign of damage, do not install it but re-fit the packaging and return it to the box. Then immediately contact the company who supplied the mirror and advise them of the problem.

TOOLS YOU'LL NEED

- Fixings Kit (in envelope)
- Screw driver
- Spirit Level

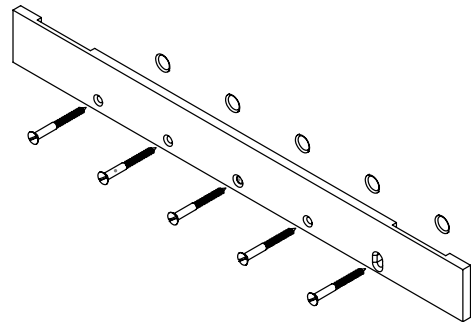

STEP 3: PREPARING THE ROOM

Ensure the wall construction is appropriate to support the mirror. Ask your client at what height they would like the mirror installed. We recommend the centre of mirror at 1650mm off FFL.

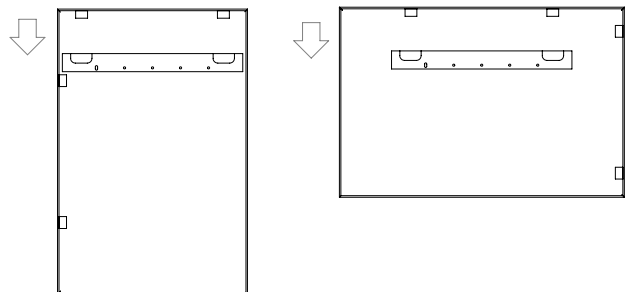

STEP 4: INSTALLATION

Supplied with the mirror is a fixing strip, which will be mounted to the wall first.

1. Place the wall fixing strip against wall in the desired position, making sure it is level and the slots are facing the wall.
2. Secure to wall. Use of fixing plugs to receive the screws will be required for tiles or stone.

3. Slide Frame on to Wall Bracket lining up the tabs on the back of the mirror with the slots in the wall fixing. Mirror can be hung portrait or landscape.

STEP 5: You're done!

Please tag @hawthorn_hill #hawthornhill on instagram to share your great work.

TILTING WALL MIRRORS INSTALLER'S GUIDE

STEP BY STEP TILTING WALL MIRROR INSTALLER'S GUIDE

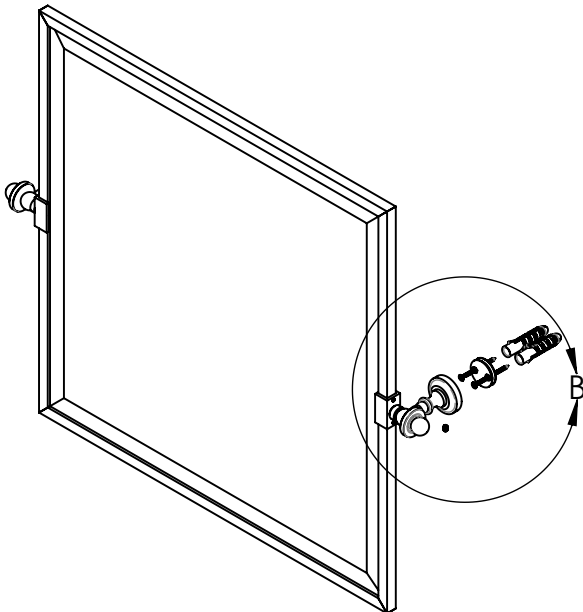

Sophisticated edges, quality UK engineering and a range of styles make our latest offering of Hawthorn Hill mirrors a superior choice.

The tilting mirrors are framed in brass, and are designed to be mounted on the wall using concealed fixings.

BEFORE YOU BEGIN

STEP 1: INSPECT THE MIRROR

Unpack the mirror carefully and remove it from its box. Remove the packaging from the mirror and ensure it is the model and size you require for this installation. Check the mirror for any sign of damage. If it is not the correct mirror or there is any sign of damage, do not install it but re-fit the packaging and return it to the box. Then immediately contact the company who supplied the mirror and advise them of the problem.

TOOLS YOU'LL NEED

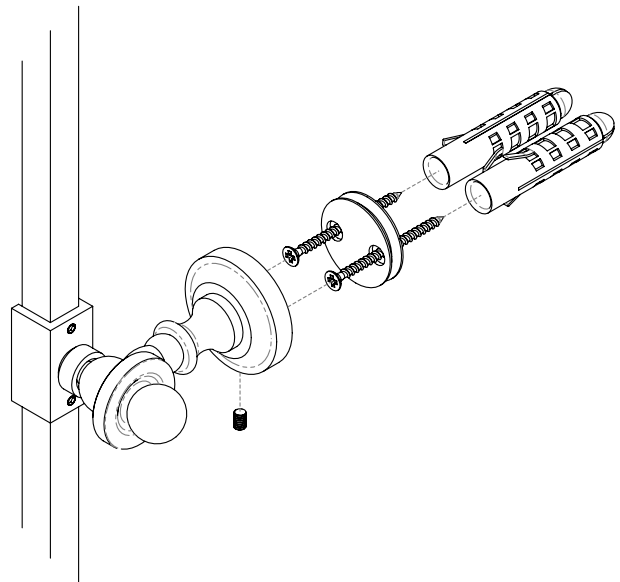

- Fixings Kit (in envelope)
- Screw driver
- Spirit Level
- Allen key
- Assistant to hold the mirror in place
- Tape measure
- Masking tape

STEP 2: PREPARING THE ROOM

Ensure the wall construction is appropriate to support the mirror. Ask your client at what height they would like the mirror installed. We recommend the centre of mirror at 1650mm off FFL.

STEP 3: INSTALLATION

1. Measure and mark out your desired height or use our recommended 1650mm bracket height.
2. Supplied with the mirror are two concealed fixing mounts. These have a groove that will receive the grub screw. Position these mounts at the required height and spacing of the mirror brackets. Note: use of fixing plugs

to receive the screws will be required for tiles or stone.

4. Ensure that the fixing mounts are secured to the wall. Call over your assistant to hold the mirror in place with the GRUB SCREW HOLES FACING TO THE CEILING. Use the allen key to tighten up the grub screws on top.

Before your assistant holding the mirror lets it go, double check that your grub screws are holding the mounts into position. If not, undo the grub screw and re-position to find the groove in the concealed plate.

STEP 4: You're done!

Please tag @hawthorn_hill #hawthornhill on instagram to share your great work.

BASIN STAND INSTALLER'S GUIDE

GUIDE TO HAWTHORN HILL BASIN STANDS

Hawthorn Hill basin stands are designed to sit directly under and support handbasins or to support a flat vanity top with an inset or vessel basin. They can have a shelf below for storage and the top bar is an ideal hand-towel rail. There are standard sizes for Perrin & Rowe and The Water Monopoly handbasins and they can be custom made to any size to perfectly complete a bathroom project.

INSTALLATION

TOOLS YOU'LL NEED

- Fixings Kit (small package inside box)
- Soft towel or blanket
- Screw driver
- Spirit Level
- Drill
- Masking tape
- Basin or benchtop
- Support angle (sold separately)

PREPARATION FOR INSTALLATION

Prior to the wall linings being fitted, the builder needs to ensure there is solid material behind each wall mounting disc for secure fixing of each wall mount. The plumber needs to ensure the hot and cold water supplies come out of the wall in the correct position and that the waste pipe is in the correct position through the wall or floor for connection of the waste trap.

INSTALLATION

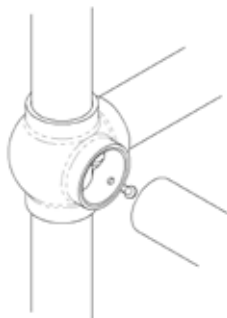

STEP 1: INSPECT THE BASIN STAND

Unpack the basin stand and carefully remove it from its box. Remove the packaging and ensure it is the model and size you require for this installation. Check the basin stand for any sign of damage. If it is not the correct basin stand or there is any sign of damage, immediately contact the person or company who supplied the basin stand and advise them of the problem.

STEP 2. ASSEMBLY

Hawthorn Hill basin stands require some assembly on site. Assemble the basin stand on the soft towel or blanket to avoid damaging the finish.

Align the labelled joints with the appropriate pieces and tighten the grub screws in place.

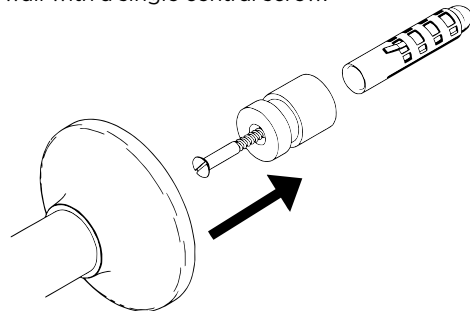

STEP 3. POSITIONING

Place the stand in its intended position against the wall. Ensure the wall construction is appropriate to support the basin stand and that the specifier has allowed for any slope in the bathroom floor. Some feet and the top caps unscrew to allow for a small variation.

Check the plumber has correctly positioned the water inlets and waste outlet.

STEP 4. FIXING WALL MOUNTS

Our basin stands are made with concealed fix wall flanges. These mounts have a hidden brass wall mounting disc fixed to wall with a single central screw.

Each wall mount has a concealed mounting disc which is secured onto the wall using a central screw. Fix these discs in their required position on the wall. Push the basin stand arms over the discs and back against the wall. Check the basin stand for plumb and level.

STEP 5. FIXING FEET PINS

Each foot (except the ball foot) will have a threaded hole into which the installer can screw the provided pins. This enables them to drill a hole in the floor to insert the pin and hold the foot in position. If required, basin stand can be custom manufactured to accommodate drastic slope in floor.

If using the feet pins into the floor, locate their position with masking-tape on the floor, remove the stand from the wall, screw the pins into the feet, drill the locating holes into the floor. Refit the stand on the wall mounts with the pins into the floor holes and secure it by tightening the grub-screws onto the mounting discs.

STEP 6: INSTALLATION OF A HANDBASIN

Make two timber supports to sit against the wall and support the rear of the basin when the front is supported on the basin stand. Level the basin and when it is sitting in the desired position, secure the basin to the wall, remove the timber supports and leave ready for the plumber to fit the taps and waste.

BASIN STAND INSTALLER'S GUIDE

INSTALLATION OF A VANITY TOP

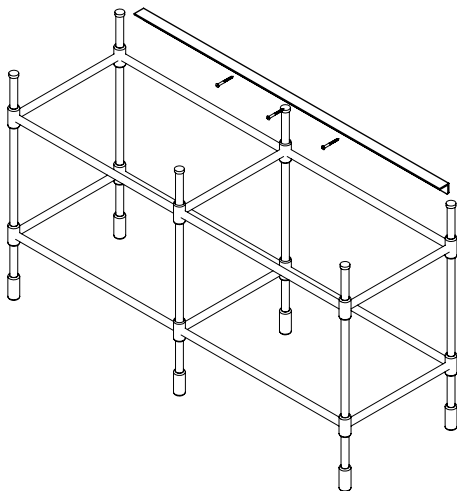

When a basin stand is supporting a vanity top, liaise with the company supplying the top to see what support it needs for the top to span between the top of the basin stand legs and the wall.

Where a top can be self-supporting between the basin stand legs, Hawthorn Hill offer 32 x 32m angle supports in 520mm and 1040mm lengths sold separately. Made of brass and finished to match the basin stand, this is screwed to the wall level with the top of the basin stand legs to support the rear of the top which can be fixed to it with a few dabs of silicone.

ANGLE SUPPORT OPTION

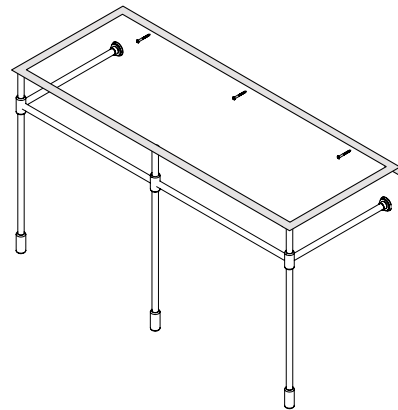

Where a vanity top can be self-supporting between the basin stand legs Hawthorn Hill offer a support angle in the following sizes (sold separately):

- Single 32 x 32 x 520mm (HH-ANGLE-520)
- Double 32 x 32 x 1040mm (HH-ANGLE-1040)

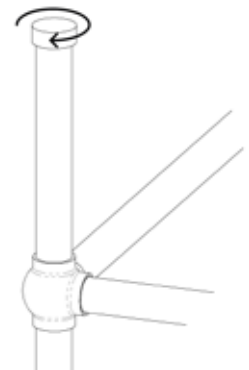

STEEL FRAME OPTION

Another solution is to have an engineer make a rectangular steel frame using 25mm angle-iron which sits on the inside face of the basin stand legs and fixes to the rear wall. The top sits on this frame and can be held in position on it with a few dabs of silicone.

A small frame can be made using flat steel with an angle steel on rear edge. To work out the dimensions of the frame:

- calculate the overall width left to right of your basin stand from outside edge of the top tube to outside edge of top tube.
- calculate the distance off your basin stand from the wall to the front outside edge of the top tube. This becomes the depth of your frame.
- to fix to the wall you will need an angle at the rear of your stand that is 25mm. Ensure the engineer drills fixing holes along the back edge. Arrange for powdercoating in desired colour.

STEP 7: FINE ADJUSTMENT

Hawthorn Hill basins stands offer fine adjustment in the top hat of each leg. Rotate these top hats to perfect the positioning of the basin or vanity top.

STEP 8: You're done!

Please tag @hawthorn_hill #hawthornhill on instagram to share your great work.

GUIDE TO PURCHASING AND INSTALLING HAWTHORN HILL ELECTRIC TOWEL WARMERS

Hawthorn Hill towel warmers are designed for drying towels and small items of clothing. While they are not intended to be room heaters, they can contribute to the warming of bathrooms and laundries.

FINISHES

They are made from 32mm brass tube and available in the following finishes. Polished Brass (BR), Brushed or Satin Brass (SB), Polished Chrome (CP), Polished Nickel (NI), Brushed or Satin Nickel (PF), Gold plating (IG), Aged Brass (AB), Bronze which is a dark brown (BZ), and Gunmetal which is nearly black (GM).

ELECTRICAL RATING

Hawthorn Hill electrically heated towel warmers are supplied complete and ready to install. They contain an electrical heating cable to provide an even heat over the full surface area.

All models are supplied with a six-metre long electrical cable, are 240V and IP55 rated. Please pass this information on to your Electrician and advise him of the location of the towel warmer in your bathroom.

CABLE POSITION

The standard position for the element cable is through the rear of the wall bracket in the top right corner. The option of the electrical cable coming through the rear of other brackets is available by specifying this at the time of ordering.

PREPARATION FOR INSTALLATION

Prior to the wall linings being fitted, the Builder needs to ensure there is solid material behind each corner of the towel warmer for secure fixing of each wall bracket. The Electrician needs to run an electrical conduit (PVC pipe) within the wall to run the cable to the switch for the towel warmer. This switch may be in an adjoining room. A draw-wire is left within the conduit so that when the towel warmer is eventually fitted, the Electrician can pull the element cable through the conduit and connect it to the electrical supply in the switch.

STEP 1: INSPECT THE TOWEL WARMER

Unpack the towel warmer carefully and remove it from its box. Remove the packaging from the towel warmer and ensure it is the model, size and heating element position you require for this installation. Check the towel warmer for any sign of damage. If it is not the correct towel warmer or there is any sign of damage, do not install it but re-fit the packaging and return it to the box. Then immediately contact the person or company who supplied the towel warmer and advise them of the problem.

STEP 2. A LICENCED INSTALLER

Installation should only be conducted by a Registered Electrician. It must be installed in accordance with the relevant electrical wiring rules and regulations, and particularly those regulations which cover installation of appliances and accessories in damp situations such as bathrooms and laundries.

PLEASE NOTE:

Standard AS/NZS 60335.2.43:2018 requires the installation instructions for fixed towel warmers to include the following warning. In order to avoid a hazard for very young children, this appliance should be installed so that the lowest heated rail is at least 600 mm above the floor. This appliance is not intended for use by young children or infirm persons unless they have been adequately supervised by a responsible person to ensure that they can use the appliance safely.

Young children should be supervised to ensure that they do not play on the appliance.

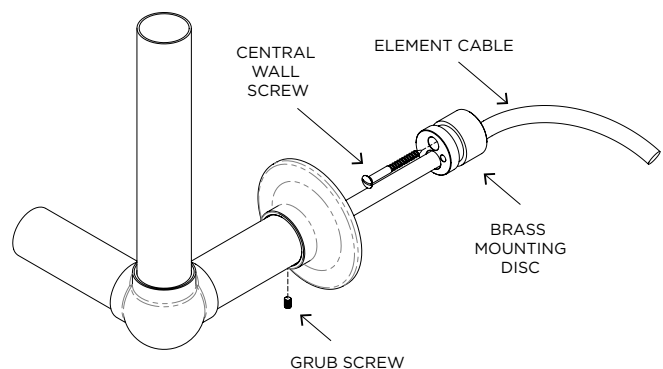

STEP 3: CHECK THE PREPARATION

Ensure the wall construction is appropriate to support the towel warmer. Ensure the Electrician has run a conduit with a draw-wire to the electrical switch.

STEP 4: INSTALLATION

Hawthorn Hill towel warmers are made with concealed fix 75mm dia. wall and floor flanges on Traditional (HHT) and Ornate (HHR) models and 60mm dia. on the Contemporary models (HHC).

Each towel warmer has four brass mounting discs which are secured onto the wall using single central screws. The heating element cable exits the towel warmer through one of these discs. Once the installer is confident the brass mounting discs are in their correct positions, the element cable is drawn through the conduit as the towel warmer is mounted over these four discs. Once sitting correctly back against the wall, secure it by tightening the grub-screws onto the mounting discs. Connect the heating cable.

STEP 5: CONTINUOUS USAGE

The Hawthorn Hill electric towel warmer has a low wattage element which can be left on continuously without detrimental effect either to the towel warmer or to the articles on it.

STEP 6: INSTALLATION COMPLETE Congratulations on a job well done! Please tag @hawthorn_hill #hawthornhill on instagram to share your great work.

BATH STAND ASSEMBLY GUIDE

STEP BY STEP BATH STAND ASSEMBLY GUIDE

Hawthorn Hill bath stands are a luxury accessories, designed and manufactured in the UK by craftsmen. The 19mm tubular legs are turned on a lathe, and then finished in one of their signature finishes. Each shelf is premium toughened glass.

BEFORE YOU BEGIN

STEP 1: INSPECT THE BATH STAND

Take all necessary precautions to ensure that this product is protected during assembly. We recommend you unpack and assemble this bath stand on a clean, soft surface such as a bath towel or blanket.

Unpack the bath stand carefully and remove it from its box. Remove the packaging from the glass and brass pieces and ensure it is the model and size you require for this installation. Check the bath stand pieces for any sign of damage. If it is not the correct bath stand or there is any sign of damage, do not install it but re-fit the packaging and return it to the box. Then immediately contact the company who supplied the bath stand and advise them of the problem.

STEP 2: PREPARING THE ROOM

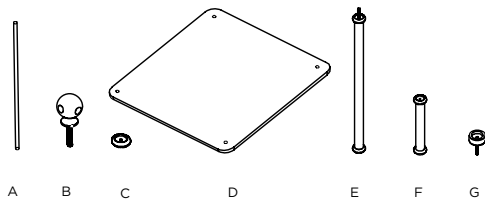

Ensure you know where your client would like this bath stand positioned. The feet are adjustable to accommodate uneven tiled floors. Remember this is a luxury item. Please do not place tools or heavy objects on the shelves.

TOOLS YOU'LL NEED

- Soft towel or blanket
- Spirit Level

PARTS PROVIDED:

- A - 4 x Top Rails
- B - 4 x Corner Ball Connectors
- C - 4 x Top Collar
- D - 3 x Glass Shelf
- E - 8 x Long Tubes
- F - 4 x Short Tubes
- G - 4 x Feet

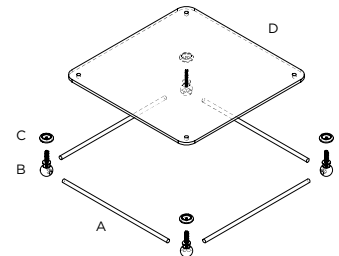

STEP 3: ASSEMBLY

This bath stand comes from UK flat-packed for assembly to avoid breakages in transit.

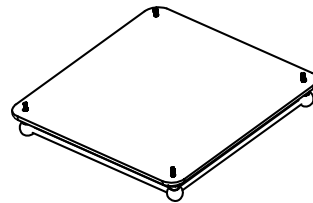

Assembly on site is simple.

1. Lay the parts on a protective sheet for assembly to minimise any damage to the surface finish (the Bathstand is assembled up-side-down for ease, starting at the top)

2. Push the round Top Rails (A) into the Corner Ball Connections (B) to make a square / rectangle. (Note; there is no fixing for these Top Rails)

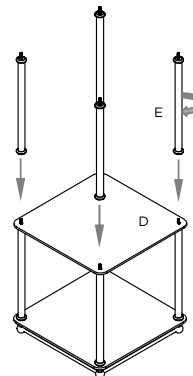

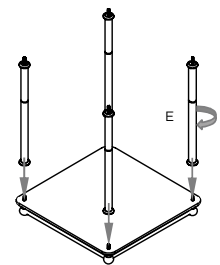

3. Put the Top Collar (C) onto the thread in the Corner Ball with Rubber Gasket facing upwards (facing glass)

4. To secure these parts in place, position Glass (D) over the 4 x Threads exposed through the glass.

5. Take 4 x Long Tubes (E) and screw them onto the exposed threads. DO NOT TIGHTEN AT THIS STAGE.

6. Once they are fixed in place, place the second Glass Shelf (D) on to the exposed threads.
