

PERRIN & ROWE[®]
MAYFAIR LONDON

Bathroom

The Perrin & Rowe Story

Thirty five years ago in London, Bob Perrin & Greg Rowe had a vision to design and produce the highest quality kitchen and bathroom tapware. Their vision was to create original and authentic designs and to manufacture them using the best materials and the latest engineering technology. Bob and Greg wanted to take tapware beyond utility; to inject style, creativity and desirability into everyday objects. Their love of design and innovation led them to develop many of today's design classics and a range of patented tapware inventions.

The Perrin & Rowe brand became recognised as a world leader in premium quality tapware and accessories. Embracing innovation and new product development, the range now includes bathroomware and contemporary tapware. All Perrin & Rowe products are still designed and made in their own factories in England by a company that values the skills of its staff and focuses on the perfection of each product it designs, makes and delivers.

Perrin & Rowe is the real thing. Authentic designs, classical styling and engineering excellence ensure that each product will stand the test of time and provide years of enjoyment.

This page: Shower Set 10C, N3230 - Wall valve set with levers and N3585 - Wall mounted low bath spout in satin brass.
Cover page: see page 44 for more details.

The Finishes

Perrin & Rowe offers New Zealand designers and home owners a wide selection of premium quality finishes. The classical collection is available in chrome, nickel, pewter, gold, and English bronze finishes. The contemporary collection is available in the chrome and pewter finishes. All taps are also available in satin or polished uncoated bare brass by special order.

Chrome: A shiny finish with a hint of blue for a classical or contemporary feel.

English bronze: A satin, rich chocolate brown finish for a bold, distinctive look.

Nickel: A shiny finish with a golden glow. If left, nickel will develop an aged patina similar to silverware, with the occasional polish restoring its original gleam.

Satin brass: This is uncoated bare brass brushed for a satin look. Brass oxidises over time to gain a characteristic patina.

Pewter: A satin (brushed) nickel finish which is the perfect complement to stainless steel sinks and appliances.

Polished brass: This is uncoated bare brass with a smooth polished finish. Brass oxidises over time to gain a characteristic patina.

Gold: This finish, which contains real Gold, will give a luxurious look.

Handle Options

Perrin & Rowe allows further customisation of the classical range, offering black glazed porcelain lever and handle inserts, as well as inserts in all of the Perrin & Rowe metal finishes.

White porcelain detailing: This is standard across the classical range.

Matching metal detailing: Available as a custom option across the classical range, to replace all porcelain parts including handshower handles.

Black porcelain detailing: Available as a custom option across the classical range, to replace all porcelain parts including handshower handles.

Provence style handle: Available as a custom option across the classical range, to replace classical handle hoods and levers.

Timeless design

Design is a fundamental process that embodies the Perrin & Rowe range. By carefully combining an aesthetic appreciation of form, scale and detail with engineering prowess, their designers continue to produce the timeless designs that Perrin & Rowe is renowned for worldwide.

Classical styling

Classical style is unique and not based on a fleeting whim of fashion. Perrin & Rowe bathroom taps reflect a harmony of fine design and well-planned functionality. This is why they are specified by top designers and architects around the world, for contemporary and classical bathrooms. They embody the essence of beautiful interiors and like any work of art, are appreciated by the discerning buyer.

Superior craftsmanship

The quality of Perrin & Rowe bathroom taps is immediately obvious: these are serious taps for people who know the difference. At Perrin & Rowe there is an immeasurable commitment to performance and durability with every tap built to last the lifetime of the bathroom. Each tap is machined from high quality brass before their skilled craftsmen hand polish, electroplate, fully assemble and rigorously test each product, for a superbly finished result.

Generations of knowledge

Drawing on generations of knowledge, Perrin & Rowe hand craft bathroomware in the traditional manner; only the best china clay from Cornwall is used and each product is hand glazed, hand finished and fired three times for a lasting, lustrous finish. Perrin & Rowe's signature white glaze has a beautifully smooth, consistent finish that is highly durable and will not craze over time.

This page (top to bottom): N3525 - Bath mixer on freestanding floorlegs with black porcelain levers, N3705 - Three hole basin mixer with low spout & black porcelain levers, N2933 & N2934 - Art Deco basin & pedestal, Shower Set 10C with black porcelain detailing, N2937B Art Deco bottom outlet toilet, N8100 EBON - Toilet seat, N6937 - Toilet brush in chrome finish.

A solution for every space

Bathroom taps

Perrin & Rowe bathroom taps are available for the basin, bath and bidet with lever or crosshead handles.

Showers

Perrin & Rowe showers are available fixed or height adjustable in a variety of configurations.

Bathroom accessories

Perrin & Rowe bathroom accessories are made from brass to the same exacting standards as the tapware.

Basins

Made in England from the finest Cornwall clay, Perrin & Rowe bathroomware is the perfect complement to the brassware collection with its lustrous and highly durable finish.

Toilets & Bidets

Made in England from the finest Cornwall clay, Perrin & Rowe bathroomware is the perfect complement to the brassware collection with its lustrous and highly durable finish.

Soap dispensers

Add a functional finishing touch with a matching soap dispenser. Models include bench mounted, wall mounted and freestanding dispensers to suit your needs.

Classical Basin Taps

Perrin & Rowe traditional basin tapware combines beautiful styling with engineering excellence. Their team of specialist designers is dedicated to perfecting the design of every tap fixture.

At a glance, these bathroom taps emanate quality while closer inspection reveals the incredible attention to detail and precision engineering of every component.

Perrin & Rowe three hole basin taps suit both traditional and modern bathrooms; with a selection of crosshead and lever handle options and a full range of finishes you are spoilt for choice. Classical basin taps are available in beautiful finishes – chrome, nickel, pewter, gold and English bronze. Also available as uncoated polished brass or satin brass.

While stunning on a Perrin & Rowe pedestal basin, these basin taps can also be mounted into a marble or granite vanity top up to 45mm thick.

All Perrin & Rowe taps feature German made ceramic disc valves ensuring many years of accurate and effortless use.

Standard white porcelain levers can be changed to black porcelain for a small additional cost.

N3521/1 - Bath/shower mixer on freestanding floorlegs with crossheads & handshower in cradle and N6910 - Bathrack in pewter finish

Classical Bath Fillers

There is nothing as luxurious as bathing. The Perrin & Rowe collection of bath fillers offers the ultimate brassware for a freestanding bath.

These Perrin & Rowe bath fillers are available in a range of styles: with or without a handshower in a cradle and with lever or crosshead handles. Although freestanding baths have become the focal point of many bathrooms, choosing a suitable bath filler on floor legs is a serious issue. Getting water into the bath from what is usually a tiled floor over a concrete slab, can present a quandary for the designer and the plumber. When fitting a bath filler on floor legs, pipe work needs to be run in advance and be accommodated by the floor's waterproofing membrane.

Cleverly, the Perrin & Rowe design allows the plumber to run standard sized water pipes under the floor and terminate them with male threads projecting past what will be the finished floor level. The waterproofing membrane is then installed followed by the finished flooring. Once all of the tiling and painting has been completed, the floor legs and bath filler are then connected onto the top of these threads and the freestanding bath installed alongside. The Perrin & Rowe floor legs incorporate on/off valves where they connect at the floor so the floor legs can be removed in the future for redecoration of the room.

N3521/1 - Bath/shower mixer on freestanding floorlegs with crossheads & handshower in cradle

N3525 - Bath mixer on freestanding floorlegs with levers

N3526 - Bath mixer on freestanding floorlegs with crossheads

Classical Bath Fillers

These Perrin & Rowe wall mounted and deck or hob mounted bath fillers are as iconic as the freestanding models. Choose from lever or crosshead handles and the option of a hand-shower with hose (made of brass, not plastic), operated by a porcelain diverter lever.

All Perrin & Rowe bath fillers feature excellent German made ceramic disc valves ensuring many years of accurate and effortless use.

Classical bath fillers are available in beautiful finishes: chrome, nickel, pewter, gold, English bronze. Also available as uncoated polished brass or satin brass.

Standard white porcelain detailing can be changed to black porcelain for a small additional cost.

Shower Sets

Undecided about the components needed to create your perfect Perrin & Rowe shower? Perrin & Rowe offer a range of shower sets for New Zealand homeowners and designers. Choose from one of the following complete shower sets and let us do the hard work – no matter your preferences, there's bound to be one that's just right for you and your bathroom. The hardest choice you'll make is the finish.

The Perrin & Rowe traditional shower sets are available in chrome, nickel, pewter, gold and English bronze. They are also available polished or satin uncoated bare brass.

The example combinations include options for separate hot and cold crosshead or lever valves or a pressure balanced or thermostatic shower mixer. You are spoilt for choice with the option of a classical handshower on sliding rail, a shower rose from the ceiling or wall, or a combination of both.

Standard white porcelain detailing can be changed to black porcelain for a small additional cost.

If you are after a fully customised shower, you can assemble your own from the individual shower components, see pages 34-38.

Shower Set 10D

The Perrin & Rowe exposed riser shower sets are a luxurious statement piece for your bathroom.

For an exposed shower over a bath, choose set 5 with a bath filler outlet, or set 6 for the additional function of a height adjustable handshower on riser pipe.

For a fully integrated shower with thermostatic mixer, select from sets 7 or set 7A for the additional function of a height adjustable handshower on riser pipe. For a non-thermostatic mixer option choose 11A-12B.

For a more minimal look that allows for a flexible location of the taps away from the flow of water, consider sets 9A-9D or sets 10A-10D for the additional function of a height adjustable handshower on riser pipe.

Each set is available in chrome, nickel, pewter, gold and English bronze. They are also available in uncoated bare brass.

Standard white porcelain detailing can be changed to black porcelain for a small additional cost.

Components

N5204 - Shower rose 310mm with perforated plate on N5384 - Overhead shower arm

Perrin & Rowe offer a range of shower and bath components for New Zealand homeowners and designers. Perrin & Rowe showers aren't prescriptive. So whatever your vision, our wide range of showerheads, valves, mixers, spouts, risers and arms mean you can virtually design your own shower and bath combination.

Shower Arms & Risers

Select from a variety of shower arms mounted on the wall or ceiling. Whether you are retro-fitting or planning a new build, you'll be sure to find a part to suit.

Shower Roses & Handshowers

The shower roses deliver a luxurious rain shower while a hand-shower offers flexibility and an equally satisfying rain style water flow.

The standard shower roses have a perforated plate, whilst easy clean versions are also available. Designed for localities where holes in a perforated plate clog with lime scale, the easy clean shower rose has silicone rubber tips protruding through the perforated plate, designed to self-clean each time the shower is used.

While Perrin & Rowe shower roses and handshowers may give the illusion of high water usage, state-of-the-art controllers limit the flow to ensure efficient and environmentally friendly use. The standard versions of the Perrin & Rowe shower outlets sold in New Zealand are fitted with a water

Classical Components

conserving flow controller complying with WELS regulations. When fitted into a high pressure system, the resulting flow rate is 7.5 to 9L/min. When Perrin & Rowe shower outlets are required for a low pressure installation, request a low water pressure version of the showers which will be fitted with different aerators to give same flow rate of 7.5 to 9 L/min.

Thermostatic Mixer

Perrin & Rowe are renowned for their beautifully engineered dual-control thermostatic shower mixers. The lower lever of the thermostatic shower mixer sets the temperature with thermostatic control, while the upper lever controls the amount of water leaving the shower outlet.

The exposed thermostatic mixer is designed for use with a riser pipe while the concealed thermostatic mixer supplies pipe work within the wall. They are both superb examples of precision engineering.

Deco Shower Components

Shower Valves & Pressure Balanced Shower Mixers

Perrin & Rowe offer separate hot and cold wall valves with German made ceramic disc valves ensuring many years of accurate and effortless use. Combination mixers are available for use with riser pipes or to connect to a handshower.

A sought-after alternative is the Perrin & Rowe single lever pressure balanced shower mixer which is a beautiful example of high quality engineering. While most other shower mixers use the same mixing cartridge as a kitchen tap, the Perrin & Rowe single lever shower mixer is fitted with a purpose-made pressure balancing valve. The valve is sensitive to changes in incoming water pressure and thus provides a constant, balanced flow and safe showering. This state-of-the-art feature in the Perrin & Rowe single lever shower mixer delivers a constant, balanced mix of the hot and cold water, even if the delivery pressure of one of them changes. In the event of a drop in the hot or cold water supply, the output will immediately reduce to the pressure of the lowest supply line.

N5862 - Contemporary four way diverter - one inlet, three outlets

Outdoor Showers

Perrin & Rowe outdoor showers are essential fittings in luxury holiday spots around the world, including Dolphin Island Resort Fiji, and Sandy Lane Resort & Spa in Barbados.

Tapware and shower fittings for outdoor use need to withstand harsh climatic conditions. Perrin & Rowe tapware and shower fittings, engineered from premium quality brass will not deteriorate over time. Exposed to the elements, uncoated bare brass will develop a characteristic bronze patina with no loss of functionality.

Install a bare brass outdoor shower at your beach house or country retreat and leave the elements to work their magic.

Uncoated polished or satin bare brass tapware is also becoming a feature in al fresco kitchens. When left uncoated, high quality brass develops a rich patina which complements organic materials like timber, marble and limestone.

We stock the following sets in bare brass and can order other models in bare brass on request:

Perrin & Rowe Example Shower Set 1A in uncoated bare brass

Perrin & Rowe Example Shower Set 3A in uncoated bare brass

Perrin & Rowe Example Shower Set 4A in uncoated bare brass

Bare brass patina after one month (top) and ten months (bottom) installed outside - Perrin & Rowe Example Shower Set 4A in polished brass (*Set 4A also includes N5542 diverter not shown*).

Art Deco Suite

With its generous proportions and elegant, timeless styling, Art Deco chinaware works equally well in both contemporary and traditional bathroom schemes. Single, two and three hole basins are available. Toilets are close coupled.

Art Deco Basins

Perrin & Rowe 630mm Art Deco basin and 525mm powder room basins can be fitted into a vanity unit, placed on a pedestal or mounted on a Hawthorn Hill basin stand. Perrin & Rowe pedestals are open at the bottom ensuring the waste pipe can be concealed within it. Hawthorn Hill basin stands are an elegant option for bathroom vanities.

Art Deco Toilets

Perrin & Rowe Art Deco toilets are made in the P (rear outlet) and S (bottom outlet) trap styles. Specify S or P version at the time of ordering. Perrin & Rowe floor mounted toilets are fitted with the latest high quality Geberit inlet and flush valves. These are operated with a dual flush push button giving a 6 litre full flush and a 3 litre half flush. They have a WELS 3 Star rating.

Perrin & Rowe toilet seats are available to fit on the Perrin & Rowe toilet pans, see page 48.

Victorian Suite

The Doric form and classic, understated lines of Victorian chinaware makes it the ideal choice for ornate or eclectic, European-look bathrooms.

Victorian Basins

The Perrin & Rowe Victorian 630mm basin and 410 powder room basin can be fitted into a vanity unit, placed on a pedestal or mounted on a Hawthorn Hill basin stand. Perrin & Rowe pedestals are open at the bottom ensuring the waste pipe can be concealed within it. Hawthorn Hill basin stands are an elegant option for bathroom vanities.

Victorian Toilets

Perrin & Rowe Victorian toilets are made in the P trap style (rear outlet). They can be used as S pans by fitting a white McAlpine elbow to the outlet. If this is needed, you can request it to be supplied with the pan at no extra cost. Perrin & Rowe floor mounted toilets are fitted with the latest high quality Geberit inlet and flush valves. These are operated with a dual flush push button giving a 6 litre full flush and a 3 litre half flush. They have a WELS 3 Star rating. Perrin & Rowe wall mounted toilets are designed to be fitted to an in-wall cistern and frame such as made by Geberit. When connected to the Geberit 4.5/3L in-wall cistern, they achieve an incredible WELS 4 Star rating.

Bidets & Bidet Taps

Bidets

Perrin & Rowe bidets, just like their matching toilets, are handcrafted in the traditional manner by teams of experienced craftsmen. Only the best china clay from Cornwall is used and each bidet bowl is hand glazed, hand finished and fired three times for a lasting, lustrous finish - assurance that it is of the highest quality available and deserving of placement into the best homes. Perrin & Rowe's signature white glaze gives a beautifully smooth, consistent finish that proves to be highly durable and will not craze over time.

The Perrin & Rowe bidet models form part of their Edwardian and Victorian bathroomware suites which also include matching pedestal hand basins, powder room basins and toilets.

Toilet Seats

Perrin & Rowe toilet seats are hand made in England from solid timber. The hinges are machined brass and available in chrome, nickel, pewter, gold, bronze and bare brass finish. The hinges feature Perrin & Rowe porcelain indices and sliding rail fixings to ensure the perfect fit on your Perrin & Rowe pan.

Seats can also be custom-made to fit existing pans. Detailed dimensions of pan required prior to ordering.

Seats are sprayed with a highly durable acid catalyst lacquer with hand sanding between coats for the highest quality finish.

Every seat is unique. The grain in the seats will vary due to the natural properties of the timber.

Bathroom Accessories

Perrin & Rowe bathroom accessories are made in England to time-honoured standards of engineering excellence and are among the finest in the world.

All components are engineered from high quality brass, hand finished and polished before being electroplated in beautiful finishes: chrome, nickel, pewter, gold, English bronze. Also available as uncoated polished brass or satin brass. These finishes complement the Perrin and Rowe range of luxury traditional kitchen and bathroom tapware.

The elegant styling of the bathroom accessories range ensures that each piece looks stunning in both traditional and contemporary bathrooms and the superb quality and attention to detail assures them a place among the design classics.

To ensure optimum functionality and beauty, no effort has been spared in the development of Perrin & Rowe bathroom accessories. The wall mounts on the range of baskets, hooks, towel rails, towel racks, soap dishes and mirrors have no visible screws to collect grime and are fixed over discs designed to be mounted to any wall surface.

Toilet Accessories

Toilet Paper Holders

For those who have struggled to fit a new roll of toilet paper, Perrin & Rowe's hinged bar toilet roll holder incorporates a hinged centre rod. This design allows the paper roll to be effortlessly replaced, without the risk of a loose roller dropping and marking the timber or tiled floor.

Perrin & Rowe's simple paper holders are available with single or double roll capacity. When installed vertically, the simple paper holder transforms into a spare paper holder.

Toilet Brushes

The Perrin & Rowe toilet brushes are of outstanding quality, with lustrous porcelain inserts and brass body coated in your choice of Perrin & Rowe finishes. The toilet brushes themselves are black, a step away from the conventional white, providing an aesthetically pleasing feature of your bathroom experience.

Towel Warmers

Hawthorn Hill towel warmers are truly beautiful pieces of engineering which stand out as a design statement in your bathroom, adding luxury and warmth. Crafted in England from top quality brass, they are then hand polished before being plated in a choice of premium finishes.

Hawthorn Hill towel warmers are available with either an electrical element or for connection to a hydronic central heating system.

Hawthorn Hill towel warmers are crafted from premium grade brass and finished in chrome, nickel, pewter, gold, oil rubbed bronze (a liquorice colour), polished brass or satin brass.

Electrically heated models are liquid filled and fitted with a 100w thermostatic heating element. This element can be easily replaced, an important sustainability feature in a towel warmer that will outlast the life of your bathroom.

Hydronically heated standard and radiator models, which all connect to a hot water central heating system, can be fitted with the Hawthorn Hill range of modern or traditional valves.

Why purchase Perrin & Rowe made for New Zealand?

In Residence is the dedicated distributor of Perrin & Rowe tapware in New Zealand, with our own showroom in Parnell, Auckland and a network of resellers around the country.

In Residence works closely with the Perrin & Rowe product designers and manufacturing team in England to design and supply products required by New Zealand homeowners and designers.

Whilst the visual appearance of Perrin & Rowe taps sold in other countries is similar to those made for New Zealand, they can be quite different.

Taps produced for other countries are not made to New Zealand Standards and a registered plumber is not able to install them into a New Zealand home.

Purchasing Perrin & Rowe products from In Residence ensures you receive goods

that are compatible with New Zealand plumbing fittings and WELS regulations.

In Residence provides a five year warranty on all Perrin & Rowe tapware, accessories and bathroomware which it imports and sells in New Zealand.

Privately imported product has no warranty here.

WELS: Water Efficiency Labeling and Standards

The New Zealand Government's Water Efficiency Labelling & Standards (WELS) scheme is designed to reduce water consumption and applies to kitchen taps, basin taps, showers and toilets, as well as other water using appliances.

All Perrin & Rowe kitchen and basin taps, shower outlets and toilets sold by In Residence comply with WELS requirements.

New Zealand Standards

Perrin & Rowe tapware imported by In Residence meets the performance requirements of the tapware Standard AS/NZS 3718:2005 Water Supply - Tap ware.

Our Perrin & Rowe toilets comply with AS 1172.1-2005 Water closets (WC) – Pans and AS1172.2-1999 Water closets (WC) – Cisterns while Perrin & Rowe bidets comply with AS 3494 – 1997 Bidettes and bidets.

Stock in New Zealand

Perrin & Rowe does not keep any stock of its products in England and manufactures to our orders. In Residence endeavours to maintain a consistent level of stock of regularly sold items in the chrome, nickel and pewter finishes. We have a small stock of the other finishes and will need to arrange for large orders of these finishes to be made for us in England. If a product is not in stock or custom orders are requested, the manufacturing time is generally 6-8 weeks.

WELS Certifications

Perrin & Rowe Kitchen and Basin Tapware

Perrin & Rowe Shower Outlets

Perrin & Rowe Toilets

Perrin & Rowe Wall Hung Pan connected to Geberit 6L/3L In-Wall Cistern

Construction

Unlike some modern tapware that is made from chrome coloured plastics or aluminium alloys, Perrin & Rowe taps are still made from solid brass. Brass has proven to be the ultimate material for tapware, withstanding years of constant use and temperature variation without cracking or distortion.

Ceramic disc valves

Superseding conventional tap washers, Perrin & Rowe taps are fitted with ceramic disc valves, operating with a quarter turn from off to on. The Perrin & Rowe shower mixer is fitted with a special pressure balancing ceramic disc cartridge which provides smooth rotational movement between hot and cold flow and between off and on positions. All valves and cartridges will provide many years of effortless and drip-free operation, are easily and inexpensively replaced and have a five year warranty.

Installation

Minimum inlet water pressure:

Single lever shower mixers and kitchen taps with a spray rinse have a minimum inlet water pressure to activate their internal mechanisms: 1 bar / 100 kPa. There is no minimum inlet water pressure for standard taps.

Maximum inlet water pressure:

5 bar / 500 kPa

Maximum inlet water temperature:

85° Celsius

The English origin and superb engineering of Perrin & Rowe bathroom taps mean that they can be used in homes with either equal or unequal inlet water pressure, where there is low pressure from a supply tank. The exception is the pressure balanced shower mixer N5506 which requires equal inlet water pressure. Please advise In Residence if you are purchasing tapware or shower fittings for installation into homes with low or uneven inlet pressures and they can be supplied set for this situation.

Handle Alignment

At Perrin & Rowe every detail counts. Every ceramic disc valve in a Perrin & Rowe product has an acetal handle alignment vernier positioned between the spindle of the valve and the spline of the handle. This vernier allows fine-tuning of the handle position during assembly and installation, for perfect handle orientation.

Warranty

Perrin & Rowe tapware has a five year warranty against manufacturing defects.
